## AGRICULTURE

We are witnessing an unprecedented rise in populations and economies, and with it the demand for food and other agricultural products. As a result, the need for the requisite skills in agriculture are ever-increasing; skills that can use technology and modern methods to shape systems, increase the quality of produce and deliver for the future.

Agri Sciences is the branch of Science that provides the research, technology and information needed for the sustainable, profitable and ethical development of the agricultural industry. Studies in agriculture include soil science, genetics, cropping and pasture systems, soil-plant interaction, livestock production, agricultural economics and agribusiness.

At Centurion University, with our experiential learning approach, we will make sure that you are equipped with the required skills to succeed in this new environment where initiative, innovation and risk-taking are valued. And along the way, champion this change.
