He has experience in breeding Groundnut (2 years), Rice (13 years) and Maize (9 years) crops. Further, he was responsible for seed research and breeder seed production of various crops for 8 years.

About the session:

Intellectual property rights (IPR) refers to the legal rights given to the inventor or creator to protect his invention or creation for a certain period of time. These legal rights confer an exclusive right to the inventor/creator or his assignee to fully utilize his invention/creation for a given period of time. The session aims to Help and aid academicians pursuing research by ensuring protection to their ideas and research work. Critical to foster innovation basically for research scholars, PhD Students and Innovators.

Objective:

- To recognize the importance of IP and to educate the pupils on basic concepts of Intellectual Property Rights.
- To identify the significance of practice and procedure of Patents.
- To make the students understand the statutory provisions of different forms of IPRs in simple forms.
- To learn the procedure of obtaining Patents, Copyrights, Trade Marks & Industrial Design
- To enable the students to keep their IP rights alive.

Outcome:

- Distinguish and Explain various forms of IPRs.
- Identify criteria to fit one's own intellectual work in particular form of IPRs.
- Apply statutory provisions to protect particular forms of IPRs.
- Analyze rights and responsibilities of holder of Patent, Copyright, Trademark, Industrial Design etc.
- Identify procedures to protect different forms of IPRs national and international level.
- Develop the skill of making searches using modern tools and techniques.
