

Centurion University Technology and Management

School of Paramedics & Allied Health Science , BBSR

Workshop on Medical Lab Technician

Date: 12-11-2019 to 13-11-2019

Resource Person: Prof. Sunil Kumar Jha

Number of participants: 57

Venue: Central Lab, SPAHS, Madhusudan Block

About Resource person: Dr. Sunil Kumar Jha is working as the Dean of School of Paramedics and Allied Health Sciences at Centurion University of Technology and Management since 2016. He has also taken the responsibility of Director of Community Diagnostic Center. His major areas of expertise are medical diagnostics , clinical pathology, diagnostic bacteriology, histopathology and patient safety. He has completed MBA-HMGT, MLT, DAF, MHD and some of the courses in Alternative Medicine. He has a working knowledge of 20 years in various universities and hospitals in various capacities such as, visiting faculty at Sikkim Manipal University, Kalinga University, Raipur and IASE deemed University, Principal of Bhava Institute of Medical Science, Director of College of Medical Technology, Bhubaneswar. He has also worked with the Health Sector Skill Council and actively supported various government programs.

About the session: Medical laboratory technicians, also known as clinical lab technicians, are specialists who use lab equipment and test procedures to determine the health of tissue and blood samples. They often work in a diagnostic laboratory, clinic and hospital laboratory, under the supervision of physicians, lab technologists and laboratory managers. MLTs often share the title "med techs" with medical technologists, medical laboratory scientists, respiratory techs, X-ray techs and pharmacy techs, which can be confusing. However, the formal distinction between technologists and technicians is that technologists hold a bachelor's degree, while technicians have diplomas, certificates or a two-year associate degree. Also, technologists have spent more classroom time, have more opportunities for advancement and earn higher salaries than technicians.

Objective:

- diagnosis of samples e.g.; blood, stool, urine etc.
- collecting, preparing and storing specimen
- Using automated equipment and computerized lab instruments capable of performing several tests at the same time

Outcome:

- Interest for medical technologies
- administering tests and preparing data reports
- laboratory equipment clean, calibrated and sterile
