About the resource person:

Dwarak Krishnan is a Simulia Technical Specialist (India) at Dassault Systèmes based in Velizy-Villacoublay, Ile-de-France.

About the Session:

This insightful FDP from Dassault Systemès was about how simulation benefits product design and development. FDP covered, easily integrate simulation with common CAD environments, link finite element analysis with optimization technology as a standard business practice, improve and validate product designs so they are optimal and durable and to use simulation to improve productivity and reduce time to market.

Objectives: To efficiently and cost-effectively develop innovative consumer products that exceeds consumer expectations via simulation-driven product development.

Outcomes:

- Participants understood simulation-driven development minimizes repetitive rounds of physical prototyping, saves time and money, validates design performance, and mitigates risk on design manufacturability.
- Develop innovative consumer goods products more efficiently and cost-effectively with solid works simulation and 3D experience works simulation solutions.
- Simulation-driven development helps in improves quality and shortens time to market.
