Scientists and researchers based across developing countries are often unable to compete for funding awards due to scarcity of opportunities but also other reasons, such as lack of writing skills. This Research Proposal Writing Workshop provides faculty and researchers with the skills and tools they need to write a strong research proposal which is the first step towards securing a funding opportunity.

### **About the Programme**

This expects to distinguish different vulnerabilities that may abuse test security in m-learning conditions and to structure the fitting security administrations and countermeasures that can be set up to guarantee test security. It moreover plans to manage the subsequent Simulated Educational test framework with a current, open source and broadly acknowledged Education Management System (EMS) and its administration expansion to the m-learning condition, to be specific the Moodbile Project. To plan a Simulated Educational Exam System (SEES) that meets the particular security prerequisites of m-learning conditions and to incorporate it with the current Moodle/Moodbile stage. This will bring about a total LMS that is both furnished with secure test administrations and reasonable for m-learning. Our goal of coordinating SEES with a notable LMS, for example, Moodle is so to get the advantages of Moodles readymade benefits in other learning angles, for example, course material organization, documentation, and so on which have been experienced and acknowledged throughout the previous 15 years. In any case, the proposed

SEES can likewise fill in as an independent Simulated Educational Exam System for m-learning situations without coordination with Moodle.
