Blurb/Shorttext:

Bhringraj is one of the potent Rasayane drug in the classical texts of Ayurveda. The traditional practitioners and tribal people of surrounding area of Gandhamardan hill region of Odisha used a plant *Limnophila rugosa* (Roth), Merrh of family Scrophulariaaceae with blue color flower in the name of Bhringraj. The present work offers a review addressing the Pharmacognosy, phytochemistry & pharmacology of *Limnophila rugosa* a (Roth) Merr. The plant is used in treatment of various ailments like pestilent fever, elephantiasis, diarrhoea, dysentery, dyspepsia & is a diverse kind of chemical constituents such as Phenolics, flavonoids, terpenoids, amino acids etc. The isolated phytochemicals as well as different extracts exhibited significant biological activities such as Antimicrobial, antioxidant. Exhaustive research regarding isolation of more phytochemical & pharmacology study of medicinal plant is still necessary so as to explore the plant regarding its medicinal importance. Therefore, the aim of this research is to boost up present day researchers in this direction to undertake further investigation of this plant.
