Abstract:

The beauty of Indian culture is to celebrate happiness as well as sorrows in gatherings of relatives, friends, and well-wishers. But with the advent of the COVID-19 pandemic, the world order has changed and social distancing has become inevitable and needs to be observed strictly to save mankind. Keeping in view the transmission of the COVID-19 virus through contacts and non-availability of medicines and vaccines, social distancing is one of the key solutions that is way out to contain this spread of the virus. As the name states, social distancing suggests that people should physically maintain distance between themselves which will reduce the chance of close contact and automatically leads to a decrease in the spread of infectious diseases like the Corona Virus and many other viruses which spread through close contact. Social distancing is possibly the most effective non-pharmaceutical way to
