**Editors****Dr. Rukmini Mishra****Dr. Ranjan Kumar Sahoo****Dr. Raghu Gogada****Centurion University of Technology and Management****Odisha, India.****Preface**

The aim in presenting this book to the researchers as well as students of various Indian universities is to provide them with an accurate and understandable matter on different approaches of Biotechnology on crop improvement. This book has been written as a reference book for students and researchers.

The field of Biotechnology is very wide and very vast research work has been done and still to be done. In the limited space and good standard, we have tried our best to incorporate some approaches.

The editors like to acknowledge the support from all the authors, publisher, President, Vice-president, Vice-chancellor, Director and Deans of
