

DYMOLA (DYNAMIC MODELLING LABORATORY)

By Mr. **Shubham Srivastav**, Prof. Mukundjee Pandey and Dr. Ashish Ranjan Dash

It is complete tool of modeling as well as simulation of all integrated and all complex products and systems that can use within automotive and aerospace, industries. It can also be used in robotics and its process and all other applications.

System

engineering

It is a multidisciplinary move which can help to achieve realization of integrated successful systems.
