Abstract: Contemporary science has perceived their dynamic action, and it has associated with present day pharmacotherapy an extent of drugs of plant source, known by obsolete metro foundations and used reliably. The data on the improvement of contemplations related to the usage of remedial plants similarly as the headway of care has extended the limit of medication masters and specialists to respond to the troubles that have ascended with the spreading of master organizations in help of man's life. Recovering with remedial plants is as old as mankind itself. The relationship among man and his mission for drugs in nature dates from the most far off past, of which there is abundant evidence from various sources: created chronicles, spared tourist spots, and even special plant remedies. Cognizance of therapeutic plants use is an eventual outcome of the various extended lengths of fights against various plant maladies due to which man made sense of how to look for after drugs in barks, seeds, natural item bodies, and various bits of the plants.

Keywords: Medicinal plants, pesticides, Green Chiretta, Cinamon, Cardamom, Cumin, Bael, Peppermint, Ajwain.

1. Introduction

The most one of a kind and old history of usage of plants as drugs has been found on a clay slab from Sumerian human progress in Nagpur, around 5000 years old (Kelly, 2009). It nearly contained 12 designs for calm course of action suggesting in excess of 250 unique plants, some of them alkaloid, for instance, poppy, henbane, and mandrake and so on. Since the time antiquated history, in scan for answer for any ailment, the humankind used to search for drugs in natural force, regardless of whether it is a
