Abstract: Immunity of the tulsi and the immuno modulatory action of tulsi has been assessed in a randomised, double blimd trial that shows that an alcohol derived extract modulates inmunity by improving marks such as IFN, and IL4, T helper and NK cells. Tulsi extracts have also been positively clinically tested against viral encephalitis amd hepatitis. Tusli leaf extracts that are standarised at 2m 5% ursolica cid in powder granule or microbed form. Tuulsi extracts are avilable in organic quality.

Keywords: Ocimum, anti bacterial property, immuno boosters, anti oxidant activity.

Introduction

Tusli or the holy basils is considered as one of the best herb that boost the immunity system. It contain phytochemicals, bioflavinoids, and anti oxidant compounds such as rosmarinic acid which is a very good anti microbial agents for treating infections the respiratory tract. Example, wild tulsi is usually cultivated around the himalayas and as strong aroma which helps in holy basil from the family lamiaceae. It has been described the queen of plants. It has been one of the most valued and holistic herbused over years in traditional medicine. Tulsi ised in different forms. Aqueous extracts from the leaves are used in herbal teas or mixed with other herbs or honey to enhance the medicinal value. Traditional uses of tulsi aqueous extracts inclide the treatment of different types of poisoning, stomach ache, common colds, headaches, malaria, inflammation, and heart diseases.

Immuno boosters development

1. Anti oxident property

Tulsi contains 2 important water soluboe flavonoid antioxidents known as orientene and vicennerie. These potent antioxidents strengthen immune system protect cellular structures DNA and delay effects of skin aging. Basils powerful oils helps clense the skin from with in.

2. Anti viral property

It is the herb for all reasons with vitamin C, antioxidants, antiseptic, and anti viral properties. For viral infections like cold, fluz etc., medicinal tulsi leaves can be a perfect solution to fight viral infections it increases immunity and recover from infections.

3. Anti microbial property

Tulsi oil at conc. of 4.5 and 2.25% completely inhibited the growth of S.aureus. and *E.coli* while the same conc. Only partly inhibited the growth of
