Report On Career Communication 3 July 2018

As a student or even as a professional, we are bound to come across aptitude, and reasoning tests at some point. These tests basically determine the best career path for the students depending on their skills and interests. They include many areas of assessment such as **Verbal Reasoning, Numerical Reasoning, Abstract Reasoning**, and other such abilities. These tests have become really common these days, especially for students who are confused and undecided about their careers. During the year 2018-2019, career communication classes had been organized for the students of the School of Applied Sciences, Centurion University of Technology and Management, and the number of student attendees was 150.

The objectives of the workshop include the following:

1. Provide a choice to the participants to opt for a particular career:

Aptitude tests are perfect for students or even professionals who aren't sure or confused about their future or present career choices. These generate ideas and options for a student's career after analyzing the skills and interests and determining a job that is best suited.

2. Impart better knowledge of their strengths and weaknesses:

Aptitude tests give students a better understanding of themselves. They are designed to reveal students' strengths and weaknesses and give a better understanding of their personalities. This is important for professional development. It may also highlight students' hidden talents.

3. Provide educational and career advice:

Once students have a better understanding of their strengths and weaknesses, it becomes easy for them to find out what career or job is best suited for them. This helps the students to know where they stand in the job market and also provides a platform to develop their skills with a variety of job opportunities.

4. Sorting the difference between interest and aptitude:

Many students regret choosing a career based on their interests. It is important to know that there is a difference between interest and aptitude. Just because they are interested in a particular field does not necessarily mean that they have the required aptitude or potential for the same. Hence, it is important to select a career that incorporates both their interest as well as their aptitude so that they can achieve success and grow.

5. Increase the Chances of Success:

Once students are aware of their interest and potential, they can easily make an informed decision. They can acquire the necessary skills for their job and develop them by appropriate training. This will, in turn, increase their chances of success in their chosen career or job.

6. Provide knowledge on career documentation:

The students gain knowledge on designing CVs, and resume and gain competence to write different types of letters that would help them to navigate various jobs in different corporate houses.

7. Develop the ability to reason:

The students develop an ability to give a proper response with respect to varied environmental conditions.

The workshop provided a conducive platform to the participants to groom them up into better individuals making them highly efficient to excel in their chosen workplaces. After the valuable inputs students divide into groups for practice sessions.

Mock interview sessions with small groups on 3 July 2018
