

1. Circular for Anti-Drug Campaign.

### Anti-Drug Campaign

It is needless to reiterate that consuming Tobacco, Pan, Gutka, Alcoholic, Drugs, and Narcotic Substances are strictly banned in our campus and all students, staff & faculties are prohibited to consume any of these. There are many cases in the past and recent too when students lost their studentship, staff/faculties lost their job for violating the same. There is zero tolerance for the violation.

On behalf of the University, We would like to make an **Emotional Appeal** to all Students, Staff, and Faculties to stay away from all these life spoiling and killing elements. We are now facing the challenge of fighting against the regular Drug & Narcotic substance Users which is on the rise and now the number of users are all-time high. We are feeling very sorry for those who lost their studentship at the University and for their respective Parents too. There are quite a few alarming numbers of students given Compulsory TC for the same offense in the recent past.

## 1. Reports on Anti-Drug Campaign.

### Anti-Drug Campaign

It is needless to reiterate that consuming Tobacco, Pan, Gutka, Alcoholic, Drugs, and Narcotic Substances are strictly banned in our campus and all students, staff & faculties are prohibited to consume any of these. There are many cases in the past and recent too when students lost their studentship, staff/faculties lost their job for violating the same. There is zero tolerance for the violation.

On behalf of the University, we would like to make an Emotional Appeal to all Students, Staff, and Faculties to stay away from all these life spoiling and killing elements. We are now facing the challenge of fighting against the regular Drug & Narcotic substance Users which is on the rise and now the number of users is all-time high. We are feeling very sorry for those who lost their studentship at the University and for their respective Parents too. There are quite a few alarming numbers of students given Compulsory TC for the same offense in the recent past.

We see there are many cases of Gutkha, Tobacco, Pan, Alcohol consumption inside our campus by students, staff, and faculties. Even students, staff and faculties are coming to class consuming Gutkha, Tobacco, Pan, and Alcohol. We have a record of these people too. To make the campus free from Gutkha, Tobacco, Pan, Alcohol, Drug, we did several activities and awareness drives in the past. But still there are many improvements to be made in this regard. We are hopeful to have your full support to make our campus free from Gutkha, Tobacco, Pan, Alcohol and Substance.

Let us ban all the staff and faculty members from taking any type of tobacco, pan, alcohol, drugs inside the campus in real spirit. If you find anyone consuming such things inside campus, make him or her stop and ask not to do so. The idea is not to blame or punish anyone, we want to help that person get out of the problem.

To support us in this initiative we call for voluntary nominations for internal "anti-drug brigade" comprising of interested students, staff & faculty to monitor these types of activities and bring out the vulnerable cases for further corrective steps. Interested persons are requested to meet the undersigned for plan out further activities on or before 21st December 2019.

during the phases of this awareness and rehabilitation process, no punishment will be given to these people. the addicted

student/staff/faculty can directly meet us for getting support too. idea is to reform & rehabilitate not to punish & harass. all necessary counseling required, support to come back to a healthy leaving practice and drug recovery mechanism will be tried.

Even after taking such measures, if such violations done by any Centurions on campus or during any official duty then punishments of economic, social, academic, criminal would be initiated as deemed fit without any compromise. Let us help and save those people and our campus too. Please join hands together to fight against the deadliest elements.

Please find attached, the presentation slides of the Anti-tobacco awareness campaign conducted in past and shared by Dr. Ghanashyam Biswas (MD, DM, ECMO), Consultant Medical Oncologist. I hope you will spread the message and help us in this regard.

All the best.

\*\*\*\*\*

Please go through the following facts on Tobacco, Gutka and Substance use:

The aim of preventing the use of these materials to create healthy communities in which people have a quality of life which includes:

- Healthy environments at work and in educational institutions
- Connections with families and friends
- Drug and crime-free society

Tobacco was introduced in India by Portuguese barely 400 years ago during the Mughal era. India is also the second-largest consumer of tobacco in the world, second only to China. The prevalence of tobacco use among adults (15 years and above) is 35%. The prevalence of overall tobacco use among males is 48 percent and that among females is 20 percent. Nearly two in five (38%) adults in rural areas and one in four (25%) adults in urban areas use tobacco in some form.

The Effects of Gutkha or Tobacco or Substance:

- Gutkha leads to Oral sub-mucous fibrosis (SMF), a pre-cancerous disease that is the first step to cancer. This has increased 20 to 30 times across the country. It also leads to the throat, esophageal cancers.
- Smoking increases the risk of macular degeneration, cataracts, and poor eyesight. It can also weaken your sense of taste and sense of smell, so food may become less enjoyable.
- Smoking also depresses appetite, so you may not be getting all the nutrients your body needs. Withdrawal from tobacco products can cause nausea.
- Oral cancers, predominantly squamous cell carcinomas of the lip, mouth, tongue, and pharynx
- Loss of appetite
- Promote unusual sleep patterns
- Loss of concentration

Substance abuse, also known as drug abuse, is the use of a drug in amounts or by methods that are harmful to the individual or others. It is a form of substance-related disorder. Differing definitions of drug abuse are used in public health, medical and criminal justice contexts. In some cases, criminal or anti-social behavior occurs when the person is under the influence of a drug, and long-term personality changes in individuals may occur as well. In addition to possible physical, social, and psychological harm, the use of some drugs may also lead to criminal penalties, although these vary widely depending on the local jurisdiction. Drugs most often associated with this term include alcohol, amphetamines, barbiturates, benzodiazepines, cannabis, cocaine, hallucinogens, mitalqal alone, and opioids. The exact cause of substance abuse is not clear, with the two predominant theories being: either a genetic disposition which is learned from others or a habit which if addiction develops, manifests itself as a chronic debilitating disease.

In 2010 about 5% of people (230 million) used illicit substances. Of these 27 million have high-risk drug use otherwise known as recurrent drug use causing harm to their health, psychological problems, or social problems that put them at risk of those dangers. In 2015 substance use disorders resulted in 307,400 deaths, up from 165,000 deaths in 1990. Of these, the highest numbers are from alcohol use disorders at 137,500, opioid use disorders at 122,100 deaths, amphetamine use disorders at 12,200 deaths, and cocaine use disorders at 11,100.
