

Drama competition on the harmful effect of plastic, Bhubaneswar Date:

10th August, 2017

Most people are aware of the problems that plastic can cause for the environment. It can take centuries for plastic to decompose. In that time, it can release harmful toxins into the ground and water. Marine animals are especially susceptible to the effects of plastic pollution, as they can mistake it for food and ingest it. This can cause them to starve or become entangled and drown while many people try to avoid using plastic as much as possible, it's still a significant part of our lives. It's used in everything from packaging to construction materials. So what can we do to reduce the harmful effects of plastic on the environment keeping in mind the ideology of **harmful effect of plastic** ,a **Drama competition on the harmful effect of plastic**, was organized by Centurion University of technology and management where 5 Schools /Department are participated. Many students took part with their excellent creativity skills out of which school of engineering and technology was declared the finalist.
