

Online chess tournament,
Bhubaneswar, Odisha
23rd, December, 2020

The origin of the game of chess is credited to India where chess was derived from the game of 'chaturanga' before the 7th century. During the 9th century, Arabia and Persia led to the emergence of the game among European countries. The queen's, as well as the bishop's modern-day powers, were framed in Spain during the end years of the 15th century. Chess can help improve your concentration power, creativity, and brain gradually. And that's why everyone should play this game regularly. This game could be an amazing option for passing your leisure time in a quality way. It will let you exercise your brain and keep you satisfied inside. Lots of people play this game as a hobby. I am also a passionate chess player and it is my hobby to play chess often. Our faculties along with the students had played their match with the opponents. As all the game is about patience, it teaches us about great patience in life.
