About the session

Education technology is a major part of the 21st-century learning experience. When incorporated properly in the classroom, tools such as computers, video conferencing, and even artificial intelligence can be used to supplement children's education, provide support to students with disabilities, and have a wide variety of additional applications and benefits.

However, implementing education technology in the classroom is not always done smoothly or successfully. Many teachers and administrators face obstacles that prevent them from sourcing, installing, and using technology that they can use to enrich their students' educations. Read on to learn about the top seven challenges facing the adoption and use of education technology today.
