**2.2.1 The institution assesses the learning levels of the students and organises special Programmes for advanced learners and slow learners**

Response:

Centurion University attracts students from a wide variety of regions - regional to international, rural to urban. Special programs are devised to address learning challenges faced by the students. These programmes are as follows:

Admission Counselling

Orientation programme

Baseline Tests: Baseline tests are conducted to provide a clear picture of what a student knows or needs to know by the time he/she is in the third year.

Bridge Courses

Mentoring

Remedial Class for Slow Learners.

E-materials.

Additional Lab Classes for Slow Learners.

Choice Bases Credit Systems (CBCS)

MOOCs: Fast learners are encouraged to register for courses from MOOCS to obtain additional certifications & additional credits.

Projects: Students get opportunities to use industry software & tools for collaborative research work & projects on a real time basis.

Collaborative Research: Advanced learners get an opportunity for joint publications, patents & products under faculty guidance.

Student Seminars

Competitive Events: Robotics, coding, drone flying, ad-mad and other events for advanced learners.

Training & Coaching

Culture Sports Responsibility (CSR): The credit-based CSR programme of the University gives the students an opportunity to develop their personality and learn from the experience of doing real tasks beyond the classroom related to culture, sports & responsibility.
