

2.5.3 IT integration and reforms in the examination procedures and processes (continuous internal assessment and end-semester assessment) have brought in considerable improvement in examination management system of the institution

Response:

The University is working for Examination Reforms in procedures, processes, integrating Information Technology (IT) & incorporating continuous Internal Evaluation Component. The University has a well-established & efficient software called “Examination Management System (EMS)” for maintaining result related records & data.

Integrating IT:

1. ERP system is in place (with no manual intervention) for
 1. Generation of admit cards and signature sheets.
 2. Generation of debarred list of students as per University Regulations for appearing examination
 3. Publication of results
2. Complete processing, compilation and declaration of result has been automated in EMS which has helped in
 1. Fast & error free compilation of results.
 2. Real time database
 3. Generation of consolidated grade-sheets immediately after publication of results.

Reforms in examination procedures & processes:

1. Conduct of examination under CCTV surveillance.
2. Introduction of feedback system (on question paper quality and evaluation standard)
3. Academic transcripts uploaded in National Academic Depository (NAD) for the benefit of students.

Innovations during/ response to COVID19 pandemic:

- An external agency with proven credentials in conduction of online examinations was hired. The requisite adaptations were incorporated into the system, tested & put

to use seamlessly for conduct of examinations without altering the pre-specified examination calendar & timely publication of result.

- In-house platform developed & currently operational for both internal & semester examinations phasing out the external agency.

Continuous internal assessment system: Conducted through class tests, presentations, assignments, classroom learning & initiatives.
