

**NAME OF THE CLUB : Animal Club**

**LOGO OF THE CLUB:**

**ABOUT THE CLUB:**

The Animal Club is a student-driven club formed Centurion to take care of the stray animals. The aim is to aid to the strays (dogs, cats, cows - and any other injured/ suffering animals) within the Campus and surrounding areas.

**OBJECTIVE OF THE CLUB:**

- To aid the strays, which include dogs, cats, cows and any other injured/suffering animal in and around the campus (BBSR)
- Provide a safe and comfortable shelter
- Spay/neuter the animals
- Raise awareness about being loving to animals

**ACTIVITIES OF THE CLUB (DONE):**

- Feeding the animals everyday at 3pm
- Providing first aid to injured animals
- Spreading awareness about the animal club in the University and outside.

**FURTHER PROPOSED ACTIVITIES OF THE CLUB:**

- Provide medical aid to the animals
- Buy/arrange collars for dogs. The collars will help for identification internally so we keep a health sheet on each animal and keep a count of them. It will also help identify the animals externally and keep them protected as well as create awareness about helping animals – which may be replicated soon by other neighboring colleges/ institutions.
- Build a shelter for the animals. Land will be requested from Centurion University.
- Appoint staff for regular cleaning of the area, and care for the sick, injured, undergoing treatment animals, etc.

- Organize events to raise awareness about animal-protection and encourage people to live and promote a cruelty-free lifestyle.
- Adoption: People can adopt the animals from the campus. However, as a safety measure for the animals, interval home checks would be mandatory; we would love to ensure that our animals have found a loving and safe home! We will also allow virtual adoption of the animals i.e., people can adopt an animal without having the need to take them home, they would help by providing financial support for that particular animal whom they wish to adopt. A third method would be for students to adopt animals on Campus and care for them while they are on the Campus. This would include, feeding, walking, medical treatment, and generally loving them to bits.

**TIMING OF THE CLUB:**

- Feeding takes place between 3pm to 5pm.

**FACULTY IN CHARGE:**

- Pradeep Kumar Sahoo
