## CENTURION UNIVERSITY OF TECHNOLOGY AND MANAGEMENT, ODISHA

## BOARD OF STUDIES MEETING HELD ON 30-06-2018

## AT BHUBANESWAR CAMPUS

SL. NO.	NAME OF THE BOS INTERNAL MEMBERS	SIGNATURE
1	Prof. Haribandhu Panda, Vice-Chancellor	
2	Prof. G. S. N.Raju, Vice-Chancellor (AP) Campus	
3	Prof. Supriya Patnaik, Deputy Vice-Chancellor	
4	Prof. A. M. Mohanty, Pro-Vice-Chancellor	
5	Prof. Anurag, Pro-Vice-Chancellor	
6	Prof. Jagannath Padhi, Director, CIT	
7	Prof. Rajdeep Mohanty, Pro-Vice-Chancellor, Placement	
8	Prof. Anita Patro, Registrar	
9	Prof. P. Pallavi, Registrar, (AP) Campus	
10	Prof. Smita Mishra Panda, Director Research, Jatni Campus	
11	Prof. S. P. Nanda, Dean (Admin.) MSSSoA,PKD, Campus	
12	Prof. Ashok Mishra, Dean School of Applied Sciences (SoAS)	
13	Prof P. K. Mohanty, Dean SoET, Jatni Campus	
14	Prof. Bijay Bhujabal, Dean SoM, Jatni Campus	
15	Prof K V D Prakash, Dean - IIE & HRD, Jatni Campus	
16	Prof B. P. Mishra, Dean SoET, PKD Campus	
17	Prof M. Devendra Reddy, Dean MSSSoA, PKD Campus	
18	Prof. S. K. Biswal, Dean, SoAS., Jatni Campus	
19	Prof. P. S. Rao, Dean R&D, PKD Campus	
20	Prof. Rashmi Ranjan Parida, PGP - Coordinator, PKD Campus	
21	Prof. Prafulla Kumar Panda, HoD, Civil, PKD Campus	
22	Prof. Tapan Kumar Rath, Adjunct Professor, Mechanical, Jatni Campus	
23	Prof. Sukant Nayak, Mechanical, PKD Campus	
24	Prof. S. N. Padhy, HoD, ECE, PKD Campus	
25	Prof. Satish Ramoji, HoD, EEE, PKD Campus	
26	Prof. M. Vijay, HoD, Chemical, PKD Campus	
27	Prof. Suvendu Kumar Jena, Agriculture Engg, PKD Campus	
28	Prof. Mir Sadat Ali, Dean - SoVET, PKD Campus	
29	Prof. K. Santosh Rao, HoD, CSE, PKD Campus	
30	Prof. Chandrabhanu Pattanayak, Director, Institute of Knowledge Societies, Jatni Campus	
31	Prof. Ambika sankar Mishra, Assistant Professor, Institute of Knowledge Societies, Jatni Campus	

SL. NO.	NAME OF THE BOS INTERNAL MEMBERS	SIGNATURE
32	Prof. Ramesh Ch. Mohanty, Mechanical Engg., Jatni Campus	
33	Prof. S. K. Mandal, ECE, Jatni Campus	
34	Prof. Manoj Kumar Rath, Civil Engg., Jatni Campus	
35	Prof. Ipsita Mishra, Mechanical Engg., Jatni Campus	
36	Prof. Sagarika Parida, Head, Department of Botany, Jatni Campus	
37	Prof. Dojalisa Sahu-HoD, Chemistry, Jatni Campus	
38	Prof. Kunja Bihari Satapathy, Emeritus Professor, Department of Botany, Jatni Campus	
39	Prof. Siba Prasad Parida, Associate Professor, Department of Zoology, Jatni Campus	
40	Prof. Goutam Kumar Mahato, Head, Department of Mathematics, Jatni Campus	
41	Prof. A. Suchitra, School of Disaster Management, Jatni Campus	
42	Prof. Sunil K Jha, SoPAH, Jatni Campus	
43	Prof. Tekchand Pradhan, SoPAH, Jatni Campus	
44	Prof. Sagarika Panda, HoD, Civil, Jatni Campus	
45	Prof. Subrat Sarangi, Dean- (IQA) Jatni Campus	
46	Prof. Partha Sarathi Mohanty, Fashion & Design, Jatni Campus	
47	Prof. Snigdha A Saniyal, Design & Planning, Jatni Campus	
48	Prof. Gurudutta Pattnaik, Principal, SoPLSc, Jatni Campus	
49	Prof. Asis Seen, School of Allied Health Science, Jatni Campus	
50	Prof. Amiya Singh, Dean, SoVET, Jatni Campus	
51	Prof. Jayakishan Meher, Head, IT, Bolangir Campus	
52	Prof. Rajesh Mishra, Dept. of Chemistry, Bolangir Campus	
53	Prof. Satyabrata Sadangi, Dept. of Mathematics, Bolangir Campus	
54	Prof. Debasish Tripathy, Dept. of Zoology, Bolangir Campus	
55	Prof. P.S.V. Ramana Rao, Dean, (AP) Campus	
56	Prof. M.L.N. Acharyulu, AP Campus	
57	Prof. Naveen Challa, AP Campus	
58	Prof. M. Vamshi Krishna, AP Campus	
59	Prof. K.V. Kalyan, AP Campus	
60	Prof. Chandana Adhikari, Principal, Rayagada Campus	
61	Prof. Biplabin Padhi, Dept. of Mathematics, Rayagada Campus	
62	Prof. Manas Ranjan Sahu, Mechanical, Rayagada Campus

## CENTURION UNIVERSITY OF TECHNOLOGY AND MANAGEMENT, ODISHA

**B. Tech. (Dairy Technology) Syllabus****SEMESTER WISE COURSE STRUCTURE****Semester – I**

S.N.	CODE	Title of the Course	Credit Hours	
1	BTME 0401	Workshop Practice	2	(1+1)
2	BTCE 0401	Fluid Mechanics	3	(2+1)
3	BTME 0202	Engineering Drawing	1	(0+1)
4	BTLS0401	Fundamentals of Microbiology	3	(2+1)
5	BTAS0401	Milk Production Management and Dairy Development	3	(2+1)
6	BTHU0401	Communication Skills	2	(1+1)
7	BTCS0401	Computer and Application Software Packages	2	(1+1)
8	BTLS0402	Biochemistry	2	(1+1)
9	BTBS0401	Environmental Studies	2	(1+1)
		<b>Total</b>	<b>20</b>	<b>(11+9)</b>

**Semester – II**

S.N	CODE	Title of the Course	Credit hours	
1	BTME0403	Thermodynamics	2	(1+1)
2	BTDT0402	Physical Chemistry of Milk	3	(2+1)
3	BTDT0403	Market Milk	4	(3+1)
4	BTME0204	Boilers and Steam Generation	2	(1+1)
5	BTDT0404	Traditional Indian Dairy Products	3	(2+1)
6	BTDT0405	Microbiology of fluid milk	2	(1+1)
7	BTHU0101	Economic Analysis	2	(2+0)
8	BTDT0406	Chemistry of Milk	3	(2+1)
		<b>Total</b>	<b>21</b>	<b>(14+7)</b>
9	DT0201	Student READY Rural Dairy Work Experience Programme-I (Summer Break)	<b>5</b>	<b>(0+5)</b>

**Semester – III**

S.N	CODE	Title of the Course	Credit Hours	
1	BTME0405	Heat & Mass Transfer	3	(2+1)
2	BTEE0401	Basic Electrical Engineering	3	(2+1)
3	BTME0406	Refrigeration & Air-conditioning	3	(2+1)
4	BTAE0401	Dairy Engineering	3	(2+1)
5	BTDT0407	Fat Rich Dairy Products	3	(2+1)
6	BTDT0408	Microbiology of Dairy Products	2	(1+1)
7	BTBS0402	Human Nutrition	2	(1+1)
8	BTHU0102	NSS(Non gradial)	1	(0+1)
		<b>Total</b>	<b>20</b>	<b>(12+8)</b>

**Semester – IV**

S.N	CODE	Title of the Course	Credit Hours	
1	BTAE0402	Dairy Process Engineering	3	(2+1)
2	BTDT0409	Starter Cultures and Fermented Milk Products	3	(2+1)
3	BTAE0403	Condensed & Dried Milks	4	(3+1)
4	BTDT0410	Quality and Safety Monitoring in Dairy Industry	3	(2+1)
5	BTDT0411	Ice-cream & Frozen Deserts	3	(2+1)
6	BTDT0412	Chemistry of Dairy Products	3	(2+1)
7	BTAS0402	Fundamentals of Dairy Extension	3	(2+1)
		<b>Total</b>	<b>22</b>	<b>(15+7)</b>
8	DT0202	Student READY Rural Dairy Work Experience Programme-II (Summer Break)	<b>5</b>	<b>(0+5)</b>

**Semester – V**

S.N.	CODE	Title of the Course	Credit Hours	
1	BTEC0401	Instrumentation and Process Control	3	(2+1)
2	BTDT0413	Cheese Technology	5	(3+2)
3	BTDT0414	By Products Technology	3	(2+1)
4	BTAE0404	Packaging of Dairy Products	3	(2+1)
5	BTDT0415	Chemical Quality Assurance	2	(1+1)
6	BTMG0401	ICT in Dairy Industry and Operation Research	4	(2+2)
7	BTAE0405	Dairy Plant Design and Layout	2	(1+1)
		<b>Total</b>	<b>22</b>	<b>(13+9)</b>

**Semester – VI**

S.N.	CODE	Title of the Course	Credit Hours	
1	BTAE0406	Food Engineering	3	(2+1)
2	BTME0407	Material Strength & Dairy Machine Design	3	(2+1)
3	BTMG0102	Marketing Management and International Trade	2	(2+0)
4	BTAE0407	Food and Industrial Microbiology	3	(2+1)
5	BTDT0416	Sensory Evaluation of Dairy Products	3	(2+1)
6	BTAE0408	Food Technology - I	3	(2+1)
7	BTAE0409	Food Chemistry	3	(2+1)
8	BTEE0402	Energy Conservation and Management	2	(1+1)
		<b>Total</b>	<b>22</b>	<b>(15+7)</b>

**Semester – VII**

S.N.	CODE	Title of the Course	Credit Hours	
1	BTAE0410	Dairy Plant Management	2	(1+1)
2	BTCM0401	Waste Disposal and Pollution Abatement	2	(1+1)
3	BTAE0411	Food Technology -II	3	(2+1)
4	BTMG0103	Entrepreneurship Development and Industrial Consultancy	2	(2+0)
5	BTMG0404	Financial Management & Cost Accounting	3	(2+1)
6	BTMA0401	Industrial statistics	2	(1+1)
7	BTDT0702	Student READY Experiential Learning Module	10	(0+10)
		<b>Total</b>	<b>24</b>	<b>(9+15)</b>

**Semester – VIII**

S.N.	CODE	Title of the Course	Credit Hours
1	DT0701	Student READY In- Plant Training	20(0+20)
		<b>Total</b>	<b>20(0+20)</b>

**Student READY (Rural Entrepreneurship Awareness Development Yojana) Program**

- Rural Dairy Work Experience programme of 10 weeks (5+5= 10 credit hours) during summer vacation (spread over 2 or 3 Semester breaks) to be introduced starting from first year. The areas of internship maybe:
 

**First year:** On Milk Production & Procurement to be taken up in State Dairy Federations/ Dairy Development Departments/Private Dairies/Animal Husbandry Department/Cattle farm/Progressive dairy farmers

**Second Year:** On Preliminary Dairy Operations to be taken up in Experimental Dairy/ Referral lab/Quality Testing/Engineering Design/Ice-Cream plant/Dairy Plants in Govt. /Private Organizations

**Third year:** Exposure to Product manufacturing operations in Dairy & Food Industry or Plant visits in each Dairy Technology course to have Industrial exposure in specialized products like Ice cream, Milk Powders, Cheese, By-products etc. should be made compulsory during summer vacation

**Fourth Year:** Experiential Learning Module of 10 (0+10) credit hours to run concurrently in the final semester along with the regular courses. This shall include development of Detailed Project Report on setting up of enterprise in the selected areas of product manufacture and Evaluation of the Module
- In plant Training of six months duration ( semester VIII): 20 (0+20) credit hours: They will be learning production of dairy products like Pasteurized milk, Butter, Ghee, Paneer, Cheese, Chhana, Flavoured milk, Ice-Cream, Kulfi, Curd, Sweet curd, Rabidi, Peda, Khoa, Rosgolla, Milk shake, Lassi, Butter milk, savories, Spray dried milk powder, Whey milk powder, Waste water treatment, Cleaning-in-Place methods, FSSAI, HACCP and it's code for dairy products, International trading of Dairy products, Organic milk and its products, Milking Machine, Milk production, Dairy farm Management etc.

**Total Credits: 181**

1. Course credit up to VII semester 141
2. Student READY program 20
3. In- Plant Training 20

## Semester-I

1	BTME 0401	Workshop Practice	2(1+1)
<p><b>Theory</b></p> <p><i>Introduction:</i> workshop practice, safety, care and precautions in workshop. <i>Wood working</i> tools and their use, Carpentry. <i>Heat treatment process:</i> Hardening, tempering, annealing and normalizing etc. <i>Metal work:</i> Metal cutting. Soldering, Brazing. <i>Welding:</i> Electric arc and Gas welding. <i>Smithy and forging operations:</i> tools and equipments. <i>Bench work:</i> The bench, flat surface filing, chipping, scrapping, marking out, drilling and screwing. <i>Introduction to following tool machines:</i> (a) Lathe Machine (b) Milling Machine (C) Shaper and Planner (d) Drilling and Boring machines (e) Grinder (f) CNC Machines etc.</p> <p><b>Practical</b></p> <p>To study different types of measuring tools used in metrology and determine least counts of vernier calipers, micrometers and vernier height gauges. Job work on filing and chipping. To study different types of fitting tools and marking tools used in fitting practice. To study various types of carpentry tools and prepare simple types of at least two wooden joints. Job work on hand hack and power hack saw. Job work on metal sheet working. Job work on butt and lap welding. To study different types of machine tools ( lathe, milling, drilling machines etc.). To prepare a job on a lathe involving facing, outside turning, taper turning, step turning, radius making, threading etc.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Khurmi R S and Gupta J K. A Text Book of Workshop Technology (Manufacturing processes), S.Chand &amp;Company Ltd., New Delhi.</li> <li>2. Workshop Practice –B.L.Juneja</li> <li>3. Workshop Practice –R.K.Rajput</li> </ol>			
2	BTCE 0401	Fluid Mechanics	3 (2+1)
<p><b>Theory</b></p> <p>Units and dimensions, Properties of fluids. <i>Static pressure of liquids:</i> Hydraulic pressure, absolute and gauge pressure, pressure head of a liquid. Pressure on vertical rectangular surfaces. Compressible and non-compressible fluids. Surface tension, capillarity. Pressure measuring devices, simple, differential, micro, inclined manometer, mechanical gauges, Piezometer. <i>Fluid flow:</i> Classification, steady uniform and non-uniform flow, Laminar and turbulent, continuity equation, Bernolli’s theorem and its applications. <i>Flow through pipes:</i> Loss of head, determination of pipe diameter. Determination of discharge, friction factor, critical velocity. Flow through orifices, mouthpieces, notches and weirs, Vena contract, hydraulic coefficients, discharge losses, Time for emptying a tank. Loss of head due to contraction, enlargement at entrance and exit of pipe. External and internal mouthpieces, types of notches, rectangular and triangular notches, rectangular weirs. Venturimeters, pitot tube, Rota meter. Water level point gauge, hook gauge. <i>Dimension analysis:</i> Buckingham’s theorem application to fluid flow phenomena. Froude Number, Reynolds number. Weber number and hydraulic similitude. <i>Pumps:</i> Classification, reciprocating, centrifugal pump. Pressure variation, work efficiency. Pump selection and sizing.</p> <p><b>Practical</b></p> <p>Study of various types of pipes and pipe fittings. Study of different types of valves. Study of reciprocating pump. Study of rotary gear pump. Study of piezo meter. Study of U tube Manometer. Study of inclined tube Manometer. Study of Venturi meter. Determination of frictional coefficient of given pipe. Determination of minor head loss. Study of Pitot tube. Study the construction and working principle of centrifugal pump. Study of Reciprocating pump. Study and measurement of flow of liquid by V- notch.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Baryal R K. A text book of Fluid Mechanics, Laxmi Publications, New Delhi.</li> <li>2. Ramanutham S. Hydraulics, Fluid Mechanics &amp; Hydraulic Machines, Dhanpatrai &amp; Sons, Delhi.</li> <li>3. Khurmi R S. Hydraulics &amp; Fluid Mechanics, S.Chand &amp; Co.Ltd., New Delhi.</li> </ol>			

	4. Modi P N and Seth S M. Hydraulics & Fluid Mechanics, Standard Book House, Delhi 5. Kapoor B S. Experiments in Fluid Mechanics, Khanna Publications, New Delhi		
3	<b>BTME0202</b>	<b>Engineering Drawing</b>	<b>1(0+1)</b>
	<p><b>Practical</b></p> <p>Drawing of lines, lettering and dimensioning types of lines, types, types of lettering, types of dimensioning. Drawing of scales. Plain scale, diagonal scale, comparative scale and Vernier scale. Drawing of projections; Orthographic projections, methods of projections. Drawing of screw threads; Types of threads and terminologies used in lit. Screw fastening: Types of nuts, types of bolts, stud, locking arrangements for nuts and Foundation bolt. Drawing of rivets and riveted joints forms of rivet heads, types of riveted; joints, failure of riveted joints. Drawing of welded joints: Forms of welds, location and dimensions of welds. Drawing of keys, cotter joint, pin joints types of keys, types of cotter joints, pin joints. Drawing of shaft couplings: Rigid couplings, loose couplings, flexible couplings universal coupling. Drawing of shaft bearings. Journal bearings, pivot bearings, collar bearings.</p> <p><b>Suggested Readings</b></p> <p>1. Engineering Drawing – N.D.Bhatt &amp; V.M Panchal 2. Engineering Drawing – K.L.Narayana &amp; P.Kanniah</p>		
4	<b>BTLS0401</b>	<b>Fundamentals of Microbiology</b>	<b>3(2+1)</b>
	<p><b>Theory</b></p> <p>Overview of history and scope of microbiology: Discovery of Microorganisms and Microscopy (types, working principles and applications); Theories of Biogenesis and a biogenesis; Contributions of Leeuwenhoek, Pasteur, Tyndal, Joseph Lister, Robert Koch, Edward Jenner and Alexander Fleming; Scope and application of microbiology in fields like Dairy, Food, Pharmaceutical, Industrial, Medical and agriculture. Classification of Microbes: Microbial classification systems, numerical taxonomy, General properties and principles of microbial classification, Whittaker's five kingdom and Carl Woese's three domain classification system; Systematic of bacteria and Bergey's manual of systematic bacteriology, Phylogenetic tree. Prokaryotic and Eucaryotic microorganisms: Structure and functions of prokaryotic cells; Differences between prokaryotes and eukaryotes; Differences between cell wall of Gram positive and Gram negative bacteria; Structure of Archeal cell wall. Microbial growth and nutrition: Bacterial growth curve; factors affecting growth of bacteria, direct and indirect methods of measurement of bacterial growth; Bacteriostatic and bactericidal agents; Common nutrient requirements and nutritional types of microorganisms. Diversity of Microorganisms: Viruses: Structure and Classification; Bacteriophages; Differences between viruses and bacteria; Fungi: Classification of Fungi; Reproduction in Fungi; Protozoa and algae. Microbial Ecology and Environmental Microbiology: Microflora of air, soil and water and Microbes of Extreme environment like Archea. Basics of Microbial Genetics and Host-Microbe interactions: DNA as the genetic material, Structure of DNA/ RNA, DNA replication, transcription and translation; Basic concepts of immunology; Role of immune system in governing host-microbe interactions, Microbial Commensalism, Colonization, Infection, Disease and Vaccines</p>		

	<b>Practical</b>	<p>General instruction for microbiological laboratory. Microscope- simple and compound; Microbiological equipments; autoclave, hot air oven, incubator, centrifuge, colorimeter, laminar Airflow, membrane filter. Simple staining- methylene blue; crystal violet; negative staining. Differential staining (Gram, spore, acid fast). Motility of microorganisms - hanging drop technique. Measurement of size of microorganisms by micrometry (ocular and stage). Preparation of commonly used growth media liquid and solid: simple and differential media. Isolation techniques for microorganisms – Streak, spread and pour plate. Enumeration of microorganisms in air and soil. Enumeration of microorganisms in water: total viable count, coliform (MPN). Visit to Microbiology Laboratory of Dairy/Food Industry.</p>	
	<b>Suggested Readings</b>	<ol style="list-style-type: none"> <li>1. Fundamentals of Microbiology- J.D.S Panwar &amp; Amit Kumar Jain</li> <li>2. Fundamental Food Microbiology-Bibek Ray&amp; Arun Bhunia</li> </ol>	

5	<b>BTAS0401</b>	<b>Milk Production Management and Dairy Development</b>	<b>3(2+1)</b>
	<b>Theory</b>	<p>Introduction to Animal Husbandry. Distinguishing characteristics of India and exotic breeds of dairy animals and their performance. Systems of breeding and methods of selection of dairy animals. General dairy farm practices - Identification, dehorning, castration, exercising, grooming, weighing. Care of animals at calving and management of neonates. Management of lactating and dry cows and buffaloes. Methods of milking, milking procedure and practices for quality milk production. Dairy farm records and their maintenance. Systems of housing dairy animals and maintenance of hygiene and sanitation at dairy farm premises. Common disease problems in dairy animals, their prevention and control. Feed nutrients required by animal body. Feed resources for milk production and their nutritive values. Digestive system of ruminants and measures of feed energy. Nutrients requirements for growth and milk production. Feeding standards, Structure and function of mammary system. Milk secretion and milk let-down. Male and female reproductive system. Estrus and reproductive cycle, Ovulation, fertilization, gestation, parturition, pregnancy diagnosis. Artificial insemination and embryo transfer and their role in animal improvement introduction to bio techniques in dairy animal production.</p>	
	<b>Practical</b>	<p>Handling and restraining of dairy animals. External body parts and judging of cows and buffaloes. Feeding and management practices of calves. Identification of common feeds and fodders. Preparation of rations for adult animals. Milking of dairy animals and cleaning and sanitation of milking equipment. Identification of reproductive and digestive organs. Demonstration of semen collection, processing and artificial insemination.</p>	
	<b>Suggested Readings</b>	<ol style="list-style-type: none"> <li>1. Handbook of Animal Husbandry-Indian council of Agricultural Research, New Delhi</li> <li>2. A Textbook of Animal Husbandry- G.C.Banerjee</li> </ol>	
6	<b>BTHU0401</b>	<b>Communication Skills</b>	<b>2(1+1)</b>
	<b>Theory</b>	<p><i>Communication Process:</i> The magic of effective communication; Building self-esteem and overcoming fears; Concept, nature and significance of communication process; Meaning, types and models of communication; Verbal and non-verbal communication; Linguistic and non-linguistic barriers to communication and reasons behind communication gap/ miscommunication. <i>Basic Communication Skills:</i> Listening, Speaking, Reading and Writing Skills; Précis writing / Abstracting/Summarizing; Style of technical communication Curriculum vitae/resumé writing; Innovative methods to enhance vocabulary, analogy questions. <i>Structural and Functional Grammar:</i> Sentence structure, modifiers, connecting words and verbals; phrases and clauses; Case: subjective case, possessive case; objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; Agreement of verb with the subject: tense, mood, voice; Writing effective sentences; Basic sentence faults;</p>	

	<p><b>Practical</b></p> <p>Listening and note taking; Writing skills, précis writing, summarizing and abstracting; Reading and comprehension (written and oral) of general and technical articles Micro-presentations and Impromptu Presentations: Feedback on presentations; Stage manners: grooming, body language, voice modulation, speed; Group discussions; Public speaking exercises; vocabulary building exercises; Interview Techniques; organization of events.</p> <p><b>Suggested Readings</b> 1. Institute Manual</p>		
7	<b>BTCS0401</b>	<b>Computer and Application Software Packages</b>	<b>2(1+1)</b>
	<p><b>Theory</b></p> <p>History, features, classification and organization and I/O peripheral devices for computers; Features of modern operating systems; number systems and coding schemes; Basics of networking and communications; Internet, email concepts and application, Word-processing and desktop publishing, Electronic spreadsheet basics and operations, Database management system basics and operations; Fundamental of presentation-graphic packages. Recent strides in computing.</p> <p><b>Practical</b></p> <p>Windows Operating System, Word Processing software operations, Presentation Graphics software operations, Internet Surfing/Email usage, RDBMS software package basic operations, Spreadsheet software package basic operations.</p> <p><b>Suggested Readings</b> 1. Computer Studies – a First course – J. Shelly and R. Hunt. 2. Programming in BASIC – E. Balagurusamy 3. Microsoft Windows XP Manual, Microsoft Office XP Manual</p>		
8	<b>BTLS0402</b>	<b>Biochemistry</b>	<b>2(1+1)</b>
	<p><b>Theory</b></p> <p><b>Bio-Molecules:</b> General structures, classification and functions of bio molecules-Amino acids, Protein Structure, Carbohydrates, Fats, Lipids, DNA and RNA. <b>Enzymes:</b> Activation energy / Transition state &amp; Enzyme Classification, Coenzymes/Co-factors &amp; Enzyme kinetics, Mechanism of enzyme action, Factors effecting enzyme activity, Enzyme inhibition, isozymes &amp; Regulatory Enzymes, Immobilization of enzyme, Ribozymes &amp; Zymogens. <b>Metabolism :</b> Glycolysis, Gluconeogenesis, TCA cycle, Glycogen synthesis and degradation, Pentose phosphate pathway, Fatty acid oxidation, Urea cycle and transaminase reactions, ATP and Electron transport chain.</p> <p><b>Practical</b></p> <p>Estimation of alkaline phosphatase by conversion of a non-chromogenic substrate to a chromogenic substrate. Effect of temperature, pH and enzyme inhibitors on the activity of the enzyme. Estimation of catalase by spectrophotometric method. Determination of the Michaelis Menten constant of an enzyme. Estimation of RNA by colorimetric method. Estimation of DNA by colorimetric method. Measurement of proteolysis and lipolysis. Estimation of Vitamin A in Ghee. Estimation of Ascorbic acid in plasma.</p> <p><b>Suggested Readings</b> 1. Principles of Biochemistry – A.L. Lehninger 2. Outlines of Biochemistry – E.E. Conn, P.K. Stump, G. Bruening and R.H. Doi 3. Principles of Biochemistry – A.C. Deb</p>		

9	BTBS0401	Environmental Studies	2(1+1)
<p><b>Theory</b></p> <p>Environmental Science: An introduction, Ecosystem: kinds, structure, characteristics, functioning, Biochemical cycles, Natural resources and their managements, Environmental pollution, Air pollution, Water pollution, Solid waste pollution, Noise pollution, Soil pollution, Radioactive pollution, Food processing industry waste and its management, Management of urban waste water, Recycling of organic waste, Recycling of factory effluent, Control of environmental pollution through low, Composting of biological waste and Sewage, uses of water disposal effluent treatment, microbial examination.</p> <p><b>Practical</b></p> <p>Environment and its analysis, Water quality parameters, collection of sample for pollution study, Determination of pH/acidity/alkalinity from sample, Estimation of dissolved oxygen, Estimation of BOD, Estimation of COD, Estimation of nitrates, Estimation of phosphates, Estimation of pollutant elements, Estimation of heavy/toxic elements, Estimation of lead/ mercury, Visit to industrial sewage disposal unit.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Benny Joseph : Environmental Studies - Tata Mac Graw Hill</li> <li>2. E. Bharucha : Text book of Environmental Studies for Under graduate courses – Universities Press. (Book prepared by UGC Committee.)</li> <li>3. Anubhav Kaushik&amp; C.P. Kaushik :Environmental Studies - New age International Publishers</li> </ol>			

### Semester-II

1	BTME0403	Thermodynamics	2(1+1)
<p><b>Theory</b></p> <p>Importance and applications of thermodynamics in Dairy/Food processing. Basic concepts: Thermodynamic systems, properties, state, processes, cycles, energy, The Zeroth Law of Thermodynamics. <i>Ideal gases</i>: Equation of state, Compression and expansion of gases. The first Law of Thermodynamics: Internal energy, enthalpy. Analysis of non-flow and flow processes. <i>The second Law of Thermodynamics</i>: Thermodynamic temperature scale, Carnot cycle, heat engine, Entropy, reversibility, availability. <i>Air Cycles</i>: Otto, Diesel, dual cycles and their efficiencies, Plotting the air cycles on p-V, T-S, p-h diagram etc. <i>I.C. Engines</i>: Concepts, Classification, Working of two stroke and four stroke cycle S.I. engines and C.I. engines. Parts of I.C. engine, Performance of IC engines.</p> <p><b>Practical</b></p> <p>A visit to dairy/ food processing plant showing the thermodynamics applications/ devices. Study of 2-stroke and 4-strokes IC engines working. Study of S.I. and C.I. engines working Study of modern fuel injection systems of I.C. engines. Study of diesel fuel supply system (pump and fuel injector) of I.C. engine. Study of fuel supply system of a petrol engine. Study of cooling system of an I.C. engine (air cooling and water cooling). Study of lubrication system of I.C. engine. Study of Solar water heater and biogas plants and appliances</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Kumar D S and Kataria S K. Thermal Science and Engineering, Kataria &amp; Sons, 4424/6, Guru Nanak Market, NaiSarak, Delhi – 110006.</li> <li>2. Domkundwar S, Kothandaraman C P and Domkundwar A V. A course in Thermal Engineering, DhanpatRai&amp;Co.Private Limited, Delhi – 110006.</li> <li>3. Brijlal and Subrahmanyam N. Heat and Thermodynamics, S.Chand &amp; Company Ltd., New Delhi – 110055.</li> </ol>			

2	BTDT0402	Physical Chemistry of Milk	3(2+1)
<p><b>Theory</b></p> <p>Constituents and gross composition of milk of different species and breeds of milch animals, <i>Colloidal State</i>: Distinction between true and colloidal solution, lypophilie &amp; lypophobic solution, properties of colloidal system. Properties of colloidal systems, Gels-their formation and properties. Milk as a colloidal system and its stability. Elementary idea about emulsion. Density: Density and specific gravity, pycnometer method, hydrometer lactometer. Density and specific gravity of milk, effect of various processing variables on the density and specific gravity of milk. <i>Liquid State</i>: Surface tension, surface energy interfacial tension. Surface tension of mixtures. Surface tension of milk and the factors affecting it. Viscosity- Definition of viscosity, Newtonian and Non-Newtonian liquids, Stokes Law, influence of temperature and concentration of solute on viscosity. Viscosity of milk, evaporated milk and condensed milk. Refractive index. Colligative Properties of Dilute Solution: Vapour pressure, Raoult's Law, Depression of freezing point, Elevation of boiling point. Freezing point and boiling point of milk. Osmosis and Osmotic pressure. Inter-relation of colligative properties. Aqueous solution of Electrolytes: Electrolytes; non-electrolytes, ionic mobility, electrical conductance, Ostwald Dilution Law, Kohlrausch Law, Electrical conductance of milk. Ionic Equilibria: Dissociation of water, ionic product of water, concept of pH and pOH and their scale. Acids and bases: Bronsted Lewis concepts of acids and bases, dissociation constants of acids and bases. Salt-their hydrolysis. Buffer solutions. Derivation of Henderson – Hasselbach equation and its application, buffer capacity and buffer index, milk as a buffer system. Equilibrium of electrolytes. pH indicators. Oxidation- Reduction: Redox potential, Nernst equation, electrochemical cells. Hydrogen, glass and calomel electrodes. Redox system of milk. Nuclear Chemistry: The nature of isotopes, radio isotopes. Half-life period of radio isotopes. Some of the important radio isotopes. Occurrence of radio nuclide in milk &amp; milk products. Molecular Spectroscopy: The spectrum of electromagnetic radiation, the laws of Lambert and Beer, visible, and ultra-violet Spectroscopy. Mention of mass, NMR spectroscopy.</p> <p><b>Practical</b></p> <p>Determination of density and specific gravity of milk using pycnometer, hydrometer and lactometer. Determination of viscosity of milk using Ostwald viscometer. Determination of surface tension of milk using Stalagmometer. Interfacial tension between water-oil phases. Determination of freezing point of milk. Preparation of a buffer solution. Determination pH of buffer solution and milk electrometrically. Determination of acidity of milk electrometrically. Determination of electrical conductance of milk. Determination of redox potential of milk. Coagulation of milk using electrolytes. Determination of refractive index of skim milk and whey. Titration of amino acid in the presence and absence of formaldehyde. Determination of PKa1 PKa2 and PL. Verification of Lambert Beer Law.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Ling, E. R. 2008. A Textbook of Dairy Chemistry. J. V. Publ. House, New Delhi.</li> <li>2. Mathur, M.P., Datta, R.D., and Dinakar, P. 2005. Textbook Of Dairy Chemistry. Indian Council Agricultural Research Publ., New Delhi.</li> <li>3. Webb, B. H., Johnson, A. H., and Alford, J. A. 1965. Fundamentals of dairy chemistry. AVI Publ. Co., New York.</li> <li>4. Walstra, P., Jenness, R. and Badings, H. T. 1984. Dairy Chemistry and Physics. 1st ed. Wiley-Inter science, New York.</li> </ol>			
3	BTDT0403	Market Milk	4(3+1)
<p>Market milk industry in India and abroad: Distinctive features of tropical dairying as compared to those of the tropical climate of developed countries. Collection and transportation of milk; a) Organization of milk collection routes b) Practices for collection of milk, preservation at farm, refrigeration, natural microbial inhibitors, lactoperoxidase system. Reception and treatment (pre-processing steps) of milk in the dairy plant: a) Reception, chilling, clarification and storage: General practices. b) Homogenisation: Definition, pretreatments, theories, synchronization of homogenizer with operation of pasteurizer (HTST) c) Effect of homogenization on physical properties of milk) <b>Bactofugation</b>: Theory and microbiology. Thermal processing of milk: a) Principles of thermal processing: kinetics of microbial destruction, thermal death curve, Arrhenius equation, D value, Z value, F value, Q10 value. b) Factors affecting thermal destruction</p>			

	<p>of microorganisms. c) Definition and description of processes: Pasteurization, thermisation, sterilization, UHT Processing. d) Product control in market milk plant. e) Defects in market milk. f) Manufacture of special milks: toned, doubled toned, reconstituted, recombined, flavoured, homogenized, vitaminised and sweet acidophilus milk. g) Manufacture of sterilized milk. h) Distribution systems for market milk. UHT processing of milk: a) Relevance of UHT processing in the tropical climate b) UHT plants: Description. Direct, Indirect, with upstream and downstream homogenization, third generation UHT plants. c) Aseptic packaging, types and systems of packaging, sterilizing packages, filling systems. d) Technical control in the UHT plant. Shelf life of UHT milk and tests for UHT milk. Nutritive value of milk. Effect of heat processing on nutritive value. Cleaning and sanitization of dairy equipment.</p> <p><b>Practical</b></p> <p>Familiarization with equipments for reception of milk in plant. Pretreatments: Chilling, clarification, filtration. Standardization and numerical relating to it. Cream separation: parts of separator and the process. Operation of LTLT, HTST pasteurizer, laboratory steriliser. Preparation of special milks; toned, double toned, standardized, flavored, sterilized. Cleaning of storage tanks, cream separators, HTST plants; manual cleaning and CIP. Detection of adulterants and preservatives in milk. Assessment of homogenisation efficiency in milk. Strength of common detergents and sanitizers used in market milk plant.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Tufail Ahmed: Dairy plant engineering &amp; management</li> <li>2. H.G.Kessler: Food engineering and dairy technology</li> <li>3. Sukumar De: Outlines of Dairy Technology</li> <li>4. Kainth, G.S. 1998. India's Rural Co-operatives. Daya Books, New Delhi.</li> <li>5. Thompkinson, D.K. and Sabikhi, L. 2012. Quality Milk Production &amp; Processing Technology. Xxvii+274 pp. New India Publishing Agency, New Delhi</li> <li>6. Banerjee, J.C. 1999. A Textbook of Animal Husbandry. 8th edn. Oxford and IBH Publishing Company Pvt. Ltd., Bombay</li> </ol>	
4	<p><b>BTME0204</b></p> <p style="text-align: center;"><b>Boilers and Steam Generation</b></p>	<p style="text-align: center;"><b>2(1+1)</b></p>
	<p><b>Theory</b></p> <p><i>Fuels</i>: Chemical properties, Calorific value and its determination, Fuel Burners, Fuel combustion analysis. <i>Renewable energy sources</i>: Concepts, classification, Types and description of renewable energy sources. <i>Properties of steam</i>: Properties of wet, dry saturated, superheated steam, Use of steam tables and Mollier charts, Analysis of energy input in steam generation and heat gain in steam consumption. <i>Steam generators</i>: Definition, classification, fire tube boilers, water tube boilers, Boiler performance parameters, Boiler mountings and Boiler accessories. Layout of steam pipe-line and expansion joints. Introduction to Indian Boiler Regulation Act. <i>Boiler Draught</i>: Definition, importance and classification of draught, Natural and artificial draught, Calculation of Height of chimney, Draught analysis. <i>Air Compressors</i>: Definition, classification, Reciprocating, Single and multi-stage reciprocating compressors and their theoretical analysis.</p> <p><b>Practical</b></p> <p>To study different types of boilers with the help of Lab models. To study Boiler mountings and steam-line layout and steam traps. Industrial exposure visit to plant with steam utilization. Study of Fire tube low pressure boiler installed in a dairy processing plant. Study of water softening plant installed with boiler in a dairy processing plant. Study the construction and working of Cochran boiler. Study of Babcock &amp; Wilcox boiler. Study of different Boiler accessories.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Rajput R K: Thermal Engineering.</li> <li>2. Mahesh M Rathore: Thermal Engineering.</li> </ol>	

5	BTDT0404	Traditional Indian Dairy Products	3(2+1)
<p><b>Theory</b></p> <p>Status and significance of traditional Indian milk products in India. <i>Khoa</i>: Classification of types, standards methods of manufacture and preservation, factors affecting yield of khoa. Mechanization in manufacture of khoa. <i>Khoa based sweets</i>: Burfi, Peda, Milkcake, Kalakhand, Gulabjaman and their compositional profile and manufacture practices. <i>Rabri and Basundi</i>: Product identification, process description, factors affecting yield, physico-chemical changes during manufacture. <i>Channa</i>: Product description, standards method of manufacture, packaging and preservation. <i>Chhana-based sweets</i>: Rasogolla, Sandesh, Rasomalai. Mechanization of manufacturing process, advances in preservation and packaging. <i>Paneer</i>: Product description, standards, method of manufacture, packaging and preservation. Mechanization of Paneer manufacturing/packaging process. <i>Chakka/Maska and Shrikhand</i>: Product description, standards, method of manufacture, small scale and industrial process of production, packaging and preservation aspects. <i>Misti Dahi</i>: Product description method of manufacture and packaging process. <i>Kheer and Payasam</i>: Product description methods of manufacture, innovations in manufacturing and packaging processes. Biopreservative principles in enhancing the self-life of indigenous milk products including active packaging.</p> <p><b>Practical</b></p> <p>Preparation of Khoa from cow, buffalo and concentrated milk. Preparation of Burfi, Peda, Kalakand, Milkcake and Gulabjamun. Preparation of Paneer from cow, buffalo and mixed milk. Preparation of Chhana from cow and buffalo milk and mixed milk. Preparation of Sandesh and Rasogolla. Preparation of kheer. Preparation of Rabri, Misti Dahi, Chhaka and Shrikhand. Visit to industry.</p> <p><b>Suggested Reading</b></p> <ol style="list-style-type: none"> <li>1. Sukumar De: Outlines of Dairy Technology</li> <li>2. Aneja, R.P., Mathur, B.N., Chandan, R.C. and Banerjee, A.K. (2002). Technology of Indian Milk Products. A Dairy India Publ., Delhi, India.</li> </ol>			
6	BTDT0405	Microbiology of Fluid Milk	2(1+1)
<p><b>Theory</b></p> <p>Microbes associated with raw milk: Significance of specific groups of microorganisms in milk i.e. psychrotrophic, mesophilic, thermophilic and thermophilic bacteria - their morphological and biochemical characteristics and classification. Microbial contaminants in raw milk, their sources during various stages of production - milking, chilling, storage and transportation with special reference to psychrotrophic microorganisms; Microbiological changes in bulk refrigerated raw milk. Sources of contamination and microbial spoilage of raw milk: Microbial contaminants of raw milk supplies, their sources during various stages of production i.e. milking, chilling, storage and transportation with special reference to psychrotrophic microorganisms and preventive measures. Types of microbial spoilage - souring, curdling, bitter cream, proteolysis, lipolysis, abnormal flavors and discoloration. Mastitis milk - types of mastitis, causative microflora of mastitis, compositional and microbiological changes during mastitis infection, their processing and public health. Concept of clean milk production: Hygienic milk production system; Cleaning and sanitation of udder, animal, utensils, equipments and dairy farm environment; Microbiological quality of milk produced in organized and un-organized sector in India and comparative information in developed world; Microflora of aseptically drawn milk and its natural antimicrobial systems - immunoglobulins, lactoferrin, lysozyme and lactoperoxidase (LP) system. Microbiological aspects of fluid milk: Pasteurization, boiling, sterilization, ultra-high temperature (UHT), non-thermal (pulsed field) micro-filtration, bacterofugation, standardization and homogenization. Significance of heat resistant and post processing contaminants in fluid milk with special reference to proteases and lipase enzymes and their role in spoilage of processed milk. Bio-film formation during processing and their control measures. Public health aspects of fluid milk: Microbial zoonotic diseases transmitted through fluid milk; Milk borne diseases - food infection, intoxication and toxin infection caused E. coli, Salmonella typhi, Staphylococcus aureus, Bacillus cereus, Listeria monocytogenes, Shigella species, Campylobacter etc. Microbiological grading and legal standards of raw and processed milk.</p> <p><b>Practical</b></p> <p>Morphological examination of common dairy microorganisms (size and shape, arrangement and sporulation). Estimation of microbial load in raw milk by standard plate count (SPC) and dye reduction tests (MBRT, RRT). Grading of processed/ market milk by total viable count, coliform and methylene blue</p>			

	reduction time. Enumeration of psychrotrophic, thermophilic, thermotolerant and spore forming bacteria in raw and market milk. Detection of sources of contamination: Air, water, utensils, equipment and personnel, line testing. Spoilage of milk caused by microorganisms: souring, sweet curdling, gassiness, lipolysis, ropiness, proteolysis and discoloration. Detection of mastitis milks: pH, SLST, somatic cell count, chloride content, Hotis test and CAMP test. Detection and estimation of coliforms: presumptive, rapid coliform and IMViC Test. <b>Suggested Readings</b> 1. Dr. S.K. Singh: Milk Microbiology 2. D. Yashwanth Kumar: Dairy Microbiology 3. Richard K. Robinson: Dairy Microbiology Handbook: The Microbiology of Milk and Milk Products,		
7	<b>BTHU0101</b>	<b>Economic Analysis</b>	<b>2(2+0)</b>
	<p><b>Theory</b></p> <p>Basic concepts-wants, goods, wealth, utility, consumption, demand and supply, Consumer behaviour-law of diminishing marginal utility and equi-marginal utility, cardinal and ordinal utility approach for consumer's behaviors. Theory of demand-law of demand, demand schedule, demand function, determinates of demand, individual consumer demand and market demand, demand forecasting, elasticity of demand, price elasticity, income elasticity and cross elasticity, Consumer's surplus. Theory of production-concepts of firm and industry, basic factors of production and their role, production function for a single product, nature of production function, laws of returns. Concepts of costs-fixed and variable costs, short run and long run costs, average and marginal costs, economics and diseconomies of scale. Concept of market-types of market, pricing and output under different market situations, market price and normal price, price determination under perfect Competition, monopoly, oligopoly and monopolistic competition. National income – GDP, GNP, NNP, disposable personal Income, per capita income, inflation.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Elementary Economic Theory - K.K. Dewett and J.D. Verma</li> <li>2. Fundamentals of Agricultural Economics - A.N. Sadhu and A. Singh</li> <li>3. Economics - Paul A. Samuelson and W.D. Nordhans</li> </ol>		
8	<b>BTDT0406</b>	<b>Chemistry of Milk</b>	<b>3(2+1)</b>
	<p><b>Theory</b></p> <p>Definition and structure of milk, factors affecting composition of milk, Nomenclature and classification of milk proteins, Casein: Isolation, fractionation and chemical composition, physico-chemical properties of casein, Whey proteins: Preparation of total whey proteins: a-Lactalbumin and b-Lactoglobulin. Properties of a-Lactalbumin and b-lactoglobulin, Immunoglobulin and other minor milk proteins and non-proteins nitrogen constituents of milk, Hydrolysis and denaturation of milk proteins under different physical and chemical environments, Estimation of milk proteins using different physical and chemical methods, Importance of genetic polymorphism of milk proteins, Milk enzymes with special reference to lipases, Xanthine Oxidase, phosphates, proteases and lacto-peroxidase, Milk carbohydrates their status and importance. Physical and chemical properties of lactose, Sugar amine condensation, amadori re arrangement, production of hydroxyl methyl furfural (HMF), Processing related degradation of lactose, Definition, general composition and classification of milk lipids. Nomenclature and general structure of glycerides, factors affecting the fatty acid composition. Milk phospholipids and their role in milk products, Unsaponifiable matter and fat soluble vitamins, Milk Salts: Mineral in milk (a) major mineral (b) Trace elements, physical equilibria among the milk salts and Milk contact surfaces and metallic contamination.</p> <p><b>Practical</b></p> <p>Sampling techniques of chemical examination of milk. Determination of pH and titratable acidity of milk. Determination of fat in milk by different methods. Determination of total solids and solids not fat in milk. Determination of total milk proteins by Kjeldahl method. Determination of casein, whey proteins and NPN in milk. Estimation of alkaline phosphatase and lipase in milk. Determination of lactose in milk. Determination of ash in milk. Determination of phosphorus and calcium in milk. Determination of chloride in milk. Determination of temporary and permanent hardness of water. Estimation of available chlorine from bleaching powder.</p>

**Semester-III**

1	BTME0405	Heat & Mass Transfer	3(2+1)
<p><b>Theory</b></p> <p><i>Basic heat transfer process:</i> thermal conductivity, convective film co-efficient, Stefan Boltzman's constant and equivalent radiation co-efficient, Overall heat transfer co-efficient, physical properties related to heat transfer. Working principles and application of various instruments for measuring temperature. <i>One-dimensional steady state conduction:</i> Theory of heat conduction, Fourier's law, Derivation of Fourier's equation in Cartesian coordinates, Linear heat flow through slab, cylinder and sphere. Heat flow through slab, cylinder and sphere with non-uniform thermal conductivity. Concept of Electrical analogy and its application for thermal circuits, Heat transfer through composite walls and insulated pipelines. <i>Steady-state heat conduction with heat dissipation to environment:</i> Introduction to extended surfaces (FINS) of uniform area of cross-section. Equation of temperature distribution with different boundary conditions. Effectiveness and efficiency of the FINS. Introduction to unsteady state heat conduction. <i>Convection:</i> Forced and free convection, use of dimensional analysis for correlating variables affecting convection heat transfer, Concept of Nusselt number. Prandtl number, Reynolds number, Grashoff number, Some important empirical relations used for determination of heat transfer coefficient. <i>Heat Exchangers:</i> General discussion, fouling factors, jacketed kettles, LMTD, parallel and counter flow heat exchangers, Shell and tube and plate heat exchangers, Heat exchanger design. Application of different types of heat exchangers in dairy and food industry. <i>Mass transfer:</i> Fick's Law of diffusion, steady state diffusion of gases and liquids through solids. Equimolar diffusion. Mass transfer co-efficient and problems on mass transfer.</p> <p><b>Practical</b></p> <p>Determination of thermal conductivity: milk, solid dairy &amp; food products. Determination of overall heat transfer co-efficient of: Shell and tube, plate heat exchangers and Jacketed kettle used in Dairy &amp; Food Industry. Studies on heat transfer through extended surfaces. Studies on temperature distribution and heat transfer in HTST pasteuriser. Design problems on heat exchangers. Study of various types of heat exchangers. Design problems on Mass Transfer Heat transfer in tubular heat exchanger: co current/ counter flow Heat transfer through composite wall. Heat transfer through legged pipes. Heat transfer through natural and forced convection.</p> <p><b>Suggested Readings</b></p> <p>1. Rajput R K. Heat and Mass Transfer, S.Chand &amp; Company Ltd, Ram Nagar, New Delhi – 110055.</p>			
2	BTME0401	Basic Electrical Engineering	3(2+1)
<p><b>Theory</b></p> <p><i>Alternating current fundamentals:</i> Generation of alternating current or voltage, magnitude of induced E.M.F. Alternating current, R.M.S value and average value of an alternating current. Phase relation and vector representation. Cycle, Time period, Frequency, Amplitude, Phase and Phase Difference, Root – Mean Square Value, Average value, Form Factor, Crest or Amplitude Factor. <i>Poly-phase Circuit:</i> - Generation of Poly-phase Voltage, Phase Sequence, Interconnection of Three Phases such as Star Connection and Delta Connection and their respective value of current and voltages, Energy Measurement by using Single and Two Watt-meters. <i>Transformers:</i> Working Principle of Transformer, Construction features of Core and Shell type transformer, Elementary theory of an Ideal Transformer, E.M.F. Equation of a Transformer, Vector</p>			

diagram of transformer with and without load, Transformer losses, voltage regulation and efficiency of transformer, Construction and working on an Single Auto-transformer, Different parts of a 11/0.4 KV, Distribution Transformer. *Three Phase Induction Motor*: - Fundamental working principles, Production of rotating magnetic fields, construction, Different types of Rotor such as Squirrel Cage and Phase wound rotors, Starting of induction motors using Direct on Line (DOL) and Star-Delta Starter. Soft starter and variable frequency drives. *Single Phase Induction Motors*:- Introduction, Different types of single phase induction motors such as Split Phase, Capacitor type, Shaded Pole type, Universal or AC series motors, Repulsion start induction run motor, Repulsion – induction motor. *DC Machine*:- Construction and operation of DC generator, types of generators and their various characteristics. DC motors: Torque speed characteristics of DC motors, Starting and speed control of DC motors by using 3-point DC Starter. *Alternators*:- Elementary working principles, Different parts of an Alternators, Relation between Speed and Frequency, E.M.F. equation in an Alternators. Different types of Circuit Breaker and its use. Introduction to DG set system. *Electric Power Economics*: -Economics of Generation of electrical energy and related important terms such as, load curve, connected load, Maximum Demand, Demand Factor, Average load or demand, Load Factor, Diversity factor and its significance, Capacity Factor or Plant factor, Utilization Factor, Plant Operating Factor and Selection of Units and related numerical, Various types of Tariff used for calculation of electricity bill. *Lighting system*: Introduction to industrial lighting system. *Energy Management and Power Factor Corrections*: - Types of energy, Energy Management, Concept of Energy Audit. Concept of Power Factor, Disadvantages of low power factor, Causes of low power factor, Various methods of improving low power factor, Location of power factor correction equipment, Advantages of power factor improvement.

### **Practical**

Introduction to various basic circuits of parallel wiring, stair case wiring, fluorescent light fitting. Study of voltage and current relationship in case of Star connected load. Study of voltage and current relationship in case of Delta connected load. Measurement of power in 3-phase circuit; for a balanced load, using watt meters. Measurement of power in 3-phase circuit; for a unbalanced load, using watt meters. Measurement of iron losses of Single Phase transformer by conducting open circuit test. Measurement of Copper losses of Single Phase transformer by conducting short circuit test. Starting and reversing the speed of a single phase induction motor. Starting and reversing the speed of a three phase induction motor using Direct on Line (DOL) Starter. Starting and reversing the speed of a three phase induction motor using manual Star Delta Starter. Starting and reversing the speed of a DC shunt motor using 3-point DC Starter. Starting of slip-ring induction motor by manual and automatic Slip-ring Induction Motor Starter. To determine the relation between induced armature voltage and speed of separately /self-excited DC Shunt Generator.

### **Suggested Readings**

1. Theraja B L and Theraja A K. A text Book of Electrical Technology, Volume: Two, S. Chand & Co Ltd., New Delhi.
2. Anwani M L 1997. Basic Electrical Engineering. Dhanpat Rai & Co. (P) Ltd. New Delhi.

3	BTME0406	Refrigeration and Air-Conditioning	3(2+1)
<p><b>Theory</b></p> <p><i>Basic refrigeration cycles and concepts:</i> Standard rating refrigerating machines; Elementary vapour compression refrigeration cycle with reciprocating, rotary and centrifugal compressors; Theoretical vapour compression cycle; Departure from theoretical vapour compression cycle, representation on <math>T</math>-<math>S</math> and <math>p</math>-<math>h</math> diagrams; Mathematical analysis of vapour compression refrigeration system. <i>Refrigerants:</i> Primary and secondary refrigerants; common refrigerants (Ammonia, Freon, <math>HFC</math>, <math>HCFC</math> etc); Brine, their properties and comparison. <i>Multi-Pressure Refrigeration Systems:</i> Applications; Multi-evaporators with single stage and multi-stage compression and expansion systems; Working, Control and mathematical analysis of above systems. <i>Refrigeration Equipments and Controls:</i> Introduction to the types, construction, operation and maintenance of Refrigeration Components, Controls and Safety Devices as used in different refrigeration applications. Capacity control methods, Refrigeration Piping; Purpose, Types, Materials, Fittings and Insulation. <i>Design and Balancing of Refrigeration System:</i> Basic elements of design of individual components and a complete refrigeration system. Input and Output design parameters, Balancing of components of refrigeration system for optimum performance. <i>Absorption Refrigeration Systems:</i> Simple vapour absorption refrigeration systems, Actual Vapour absorption refrigeration system, Refrigerant absorbent pairs, Absorption cycle analysis. <i>Cryogenic Freezing:</i> Cryogenics, cryogenics, properties, applications, cryogenic freezers. <i>Psychrometry:</i> Definition, properties of moist air, psychrometric charts, psychrometric processes; Cooling/Heating coils, humidifiers and dehumidifiers, Temperature and humidity measurements and controls. <i>Air-conditioning Systems:</i> Types of cooling loads and their calculation, Design conditions for Human and Industrial air conditioning systems, Analysis of different air-conditioning systems with the help of psychrometric chart. <i>Cold Storage:</i> Types of cold storages, Types of cooling loads in cold storages used for food/ dairy products; Construction and operation of cold storage. Insulating materials and vapour barriers</p> <p><b>Practical</b></p> <p>Study of different types of Refrigeration tools generally used in installation and maintenance of a refrigeration plant/ equipment including charging and leakage-detection tools. Study of specification, components, operation, control, maintenance and precautions taken during working of a Domestic refrigerator. Study of specifications, components, operation, control, maintenance and precautions taken during working of a Water cooler. Study of specifications, components, operation, control, maintenance and precautions taken during working of a Bulk milk cooler. Study of specifications, components, operation, control, maintenance and precautions taken during working of a Walk-in-cooler. Study of different parts and learn the operation of a refrigeration plant/ice plant using ammonia refrigerant. Estimation of installed cooling capacity with the help of observed working pressures. Study of specifications, components, operation, control and maintenance of Ice Bank Tank (IBT). Study of specifications, components, operation, control and maintenance of a Cold Storage. Study of the Evaporative Cooling Devices like Cooling Tower, Spray Pond, Air-Washer or Room air-cooler etc. Study of the parts and components of different types of refrigerant compressors used in various refrigeration applications. Study of different types of capacity control devices used with compressors in a refrigeration plant. Experimental study of a simple refrigeration system on refrigeration tutor or an experimental set-up. (Comparison of actual and theoretical performance). Experimental study of a year-round air-conditioning system on an air-conditioning tutor or an experimental set-up. Determination of SHF and By-pass factor etc. Study and plotting of psychrometric processes using refrigeration/air-conditioning tutor. Measurement of psychrometric properties using psychrometric meters/gadgets Industrial exposure visit to refrigeration/air-conditioning plant.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1.ASHRAE Handbook</li> <li>2. Refrigeration and Air Conditioning:C.P.Arora</li> </ol>			

4	BTAE0401	Dairy Engineering	3(2+1)
<p><b>Theory</b></p> <p><i>Sanitization:</i> Materials and sanitary features of the dairy equipment. Sanitary pipes and fittings, standard glass piping, plastic tubing, fittings and gaskets, installation, care and maintenance of pipes &amp; fittings. Description, working and maintenance of can washers, bottle washers. Factors affecting washing operations, power requirements of can the bottle washers, CIP cleaning and designing of system. <i>Mechanical Separation:</i> Fundamentals involved in separation. Sedimentation, Principles involved in filtration, Types, rates of filtration, pressure drop calculations. Gravity setting, principles of centrifugal separation, different types of centrifuges. Application in Dairy Industry, clarifiers, tri processors, cream separator, self-dislodging centrifuge, cold and hot separators, Bactofuge, in-line standardization system, care and maintenance of separators and clarifiers. <i>Homogenization:</i> Classification, single stage and two stage homogenizer pumps, power requirement, care and maintenance of homogenizers, aseptic homogenizers. <i>Pasteurization:</i> Batch, flash and continuous (HTST) pasteurizers, Flow diversion valve, Pasteurizer control, Care and maintenance of pasteurizers. <i>Sterilization:</i> Different type of sterilizers, in bottle sterilizers, autoclaves, continuous sterilization plant, UHT sterilization, Aseptic packaging and equipment. Care and maintenance of Sterilizers. <i>Packaging machines:</i> Pouch filling machine pre-pack and aseptic filling bulk handling system Principles and working of different types of bottle filters and capping machine, Blow molding machines, Aseptic PET bottle filling machine. Cup filling system. Care and maintenance. <i>Mixing and agitation:</i> Theory and purpose of mixing. Equipments used for mixing solids, liquids and gases. Different types of stirrers, paddles and agitators. Power consumption of mixer-impeller, selection of mixing equipment in dairy industry, mixing pumps.</p> <p><b>Practical</b></p> <p>Study of S. S. pipes, fitting and gaskets. Study and selection of pump. Study of different types of milk filter. Study of equipments at raw milk reception dock. Constructional details, operation and maintenance of straight through can washer. Constructional details, operation and maintenance of C.I.P. system. Constructional details, operation and maintenance of homogenizers. Constructional details, operation and maintenance of batch pasteurizer. Constructional details, operation and maintenance of HTST pasteurizer. Comparison of conventional and modern pasteurizer. Constructional details, operation and maintenance of cream separators. Constructional details, operation and maintenance of sterilization systems. Constructional details, operation and maintenance of pouch filling machine. Constructional details, operation and maintenance of different types of agitators. Constructional details, operation and maintenance of bottle filling and capping machine. Visit to a dairy processing plant.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Ahmad, T. 1985. Dairy Plant Systems Engineering. Kitab Mahal Publ., Allahabad.</li> <li>2. Dairy Processing Handbook. 1995. Tetra Pak Processing Systems AB, Sweden.</li> <li>3. Kessler. 1981. Food Engineering and Dairy Technology. V.A. Kessler Publ., Freising, Germany.</li> <li>4. McCabe, W., Smith, J. and Harriott, P. 1993. Unit operations of Chemical Engineering. Mc-Graw Hill Inc. New York.</li> </ol>			

5	BTDT0407	Fat-Rich Dairy Products	3(2+1)
<p><b>Theory</b></p> <p>Status of fat-rich dairy products in India and abroad. <i>Cream</i>: a) Definition &amp; Legal standards, efficiency of cream separation and factors affecting it; control of fat concentration in cream. b) Planning and operating a cream production unit) neutralization, standardization, pasteurization and cooling of cream. c) Preparation and properties of different types of cream; table cream, sterilized cream, whipped cream, plastic cream, frozen cream and chip-dips (cultured cream), UHT processing of cream. d) Factors affecting quality of cream; ripening of cream e) Packaging, storage and distribution, defects (non-microbial) in cream and their prevention. <i>Butter</i>: a) Introduction to the butter making process; theory of churning, Legal standards. b) Technology of Butter manufacture, Batch and continuous methods. Over-run in butter; control of fat losses in butter-milk; packaging and storage; transportation; defects in butter; rheology of butter; uses of butter. Butter making equipment: Construction, operation, care and maintenance of cream separators, coolers and vacreator, factory butter churn and continuous butter making machine. Special butters and related products: a) Manufacture, packaging, storage and properties of whey butter, flavoured butter, whipped butter, renovated butter/fractionated and polyunsaturated milk fat products, vegetable oil-blended products and low-fat spreads. b) Manufacture, packaging, storage and characteristics of margarine of different types. <i>Ghee and butter oil</i>: a) Methods of ghee making-batch and industrial processes, innovations in ghee production, procedure, packaging and preservation of ghee; utilization of substandard milk. b) Ghee: Composition and changes during manufacture fat constants. C) Butter oil: Manufacture of butter oil, packaging and storage.</p> <p><b>Practical</b></p> <p>Standardization, neutralization, pasteurization and cooling of cream. Preparation of sterilized cream. Study of construction and cooperation of the power operated butter churn and butter packaging machine. Preparation of cooking butter by the hand operated churn. Preparation of desi butter. Manufacture of table butter using the power-driven churn. Preparation of ghee from cream and butter. Study and operation of continuous ghee plant.</p> <p><b>Suggested Reading</b></p> <ol style="list-style-type: none"> <li>1. Anantakrishnan, C.P. and Srinivasan, M.R.1964. Milk Products of India. ICAR Publications, New Delhi.</li> <li>2. Aneja, R.P., Mathur, B.N., Chandan, R.C. and Banerjee, A.K. 2002. Technology of Indian Milk Products. A Dairy India Publication, Delhi.</li> <li>3. Oxford University Press, Delhi.</li> <li>5. Rangappa, K.S. and Acharya, K.T. 1974. Indian Dairy Products. Asia Publishing House, New Delhi.</li> </ol>			
6	BTDT0408	Microbiology of Dairy Products	2(1+1)
<p><b>Theory</b></p> <p><i>Microbiology of Cream and Butter</i> -Micro-environment and impact of critical process factors on entry of spoilage and pathogenic organisms in cream and butter; Microbiological aspects including defects in pasteurized (ripened/ unripened cream), sterilized and UHT cream; Factors influencing the microbial growth during batch/continuous butter making process; Microbial Defects in butter - Bacterial/mold discoloration, enzymatic deterioration and their control measures; Regulatory microbiological standards. <i>Microbiology of Condensed, Evaporated and Dried products</i>: Type of microorganisms associated with condensed, evaporated and dried products, their growth/ survival during manufacture and storage; Microbial defects - Bacterial thickening / Mold button formation in SCM; Gassiness/bloating, Bacterial coagulation (Sour and sweet), Bitterness, Fishy flavor in evaporated milk; pre-heating/DSI temperature and their impact on microflora of dried products; Effect of reconstitution on microbial quality of milk powder including baby foods and survivability of pathogens; Regulatory microbiological standards. <i>Microbiology of Ice Cream and Frozen desserts</i> Microenvironment in ice cream, microbiological quality of ingredients, critical process factors and their impact on entry of pathogens in ice cream and frozen desserts, their survival during storage, food poisoning out breaks and legal standards.</p>			

*Microbiology of Indigenous Milk Products:* Predominance of spoilage and pathogenic organisms in khoa and khoa based sweets – burfi, peda, gulabjamun, etc., paneer, Chhanna and Chhanna based sweets – rasogulla; kheer, shrikhand, dahi, kulfi etc.; Factors affecting the microbiological quality in reference to production, processing, storage and distribution; Microbial safety in relation to potential pathogens and their public health significance; Microbial defects, control measures and legal standards; Active packaging concepts and role in bio-preservation.

### Practical

Microbiological examination of raw, pasteurized, sterilized and UHT cream for Standard plate count (SPC) as well as lipolytic and coliform counts, direct microscopic count (DMC), dye reduction tests and sterility test. Microbiological examination of salted and unsalted butter for SPC, psychrotrophic, lipolytic, coliforms and yeast and mold count; K.Q test. Microbiological examination of concentrated milk for SPC, coliforms, spores, yeast and mold, thermophilic and thermophilic counts. Microbiological examination of dried milks for SPC, coliforms, *Staph.aureus*, *B. cereus*, *E. coli*, *Salmonella*, Sulphite reducing clostridia and Staphylococcal enterotoxins. Microbiological examination of ice-cream and other frozen desserts for SPC, coliforms and Staphylococcal counts; Detection of *Salmonella* spp./*E. coli*. Microbiological examination of khoa for SPC, coliforms and staphylococcal counts besides yeast and mold counts. Microbiological examination of paneer and shrikhand for SPC, Spores, coliforms, yeast and molds and Staphylococcal counts. Microbiological examination of packaging materials for SPC, Spores and Yeast and mold counts.

2. Varnam, A.H. and Sutherland, J.P. 1994. Milk and Milk Products: Technology, Chemistry and Microbiology, Vol. I, Food Products Series. Chapman and Hall, London.
3. Robinson, R.K. 2002. Dairy Microbiology Handbook - The Microbiology of Milk and Milk Products. 3rd ed. Wiley-Interscience, New York.

7	<b>BTBS0402</b>	<b>Human Nutrition</b>	<b>2(1+1)</b>
	<p><b>Theory</b></p> <p>Fundamentals of human nutrition, concept of balanced diet, nutrient requirements of different age groups. Methods of evaluation of nutritive value of food and nutritional value of cow, buffalo and human milk, biochemical composition and energy value of foods with special reference to milk and dairy products. Nutrition, digestion and absorption, Vitamins (structure and function), Hormones (structure and function), Milk intolerance and hypersensitivity, Safety aspects of food additives, toxic elements, antibiotics, radionuclide's in milk and milk products. Nutraceutical, antioxidants, food toxins, anti-nutritional factors, probiotics and cultured dairy products. Biochemical aspect of post-harvest storage specifically food spoilage.</p> <p><b>Practical</b></p> <p>Estimation of serum Protein (Biuret method /Lowry method). Estimation of Blood Glucose (Folin Wu method). Estimation of Serum inorganic phosphorus (Fiske and Subba Row method). Estimation of blood creatinine, triglyceride and cholesterol levels. Estimation of calorific value of food items. Diet and nutrition surveys: (a) Identification of vulnerable and risk groups. (b) Diet survey for breast-feeding and weaning practices of specific groups. (c) Use of anthropometric measurement in children. Preparation of visual aids for nutritional disorders. Field visit to (a) Observe the working of nutrition and health oriented programmes (survey based result). (b) Hospitals to observe nutritional deficiencies. Identification of Mono, Di and Polysaccharides. Identification of Proteins (albumin, gelatin, peptone). Planning and preparation of high protein, low fat and specialized diets. Detection of antibiotic/toxin in food products.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Anjana Agarwal, Shobha A Udipi: Textbook of Human Nutrition</li> <li>2. ## Semester-IV

1	BTAE0402	Dairy Process Engineering	3(2+1)
<p><b>Theory</b></p> <p><i>Evaporation:</i> Basic principles of evaporators, construction and operation, Different types of evaporators used in dairy industry, Calculation of heat transfer area and water requirement of condensers, Basic concepts of multiple effect evaporators, Operations and various feeding systems, Economy of operation, Thermo processor and MVR system, Care and maintenance of evaporators. <i>Drying:</i> Introduction to principle of drying, Equilibrium moisture constant, bound and unbound moisture, Rate of drying- constant and falling rate, Effect of Shrinkage, Classification of dryers-spray and drum dryers, spray drying, etc., air heating systems, Atomization and feeding systems. Factors affecting bulk density of power, spray dryer controls, Theory of solid gas separation, cyclone separators, Bag Filters, Care and Maintenance of drum and spray dryers. <i>Fluidization:</i> Mechanisms of fluidization characteristics of gas-fluidization systems, Minimum Porosity, Bed Weight, Pressure drop in fluidized bed, Application of fluidization in drying, Batch fluidization, Fluidized bed dryers. <i>Processing equipments:</i> Mechanization and equipment used in manufacture of indigenous dairy products, Ice-cream and Cheese making equipments. <i>Packaging equipments:</i> Packaging machines for milk &amp; milk products. <i>Membrane Processing:</i> Ultra filtration, Reverse Osmosis and electro dialysis, Materials for membrane construction, Ultra filtration of milk, Effect of milk constituents on operation, membranes for electro-dialysis.</p> <p><b>Practical</b></p> <p>Constructional details, operation and maintenance of Vacuum pan. Constructional details, operation and maintenance of multiple effect evaporator. Constructional details, operation and maintenance of spray drier. Constructional details, operation and maintenance of butter making equipment. Constructional details, operation and maintenance of equipment related to ghee production. Constructional details, operation and maintenance of ice-cream making equipment. Constructional details, operation and maintenance of cheese making equipment. Constructional details, operation and maintenance of reverse osmosis and ultra-filtration system. Design problems on double effect evaporator and vacuum pan. Visit to a milk product plant.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Ahmed, T. 1985. Dairy Plant System Engineering. Kitab Mahal, K.L. Agencies Pvt. Ltd., New Delhi.</li> <li>2. Ahmed, T. 1990. Dairy Plant System Engineering and Management. Kitab Mahal, K.L. Agencies Pvt. Ltd., New Delhi.</li> <li>3. Anantkrishnan, C.P. and Simha, N. N. 1987. W. 1963. Engineering for Dairy and Food Products. John Wiley and Sons, New York.</li> <li>6. Gardner, A. W. 1971. Industrial drying. Leonard Hill Publ., London.</li> <li>7. Kessler. 1981. Food Engineering and Dairy Technology. V. A. Kessler Publ., Freising, Germany.</li> </ol>			
2	BTDT0409	Starter Cultures and Fermented Milk Products	3(2+1)
<p><b>Theory</b></p> <p><i>Types, metabolism and propagation of starter cultures:</i> History, classification and importance of starter Cultures in dairy industry; Single, multiple, defined and mixed strain starters; Probiotics and Special cultures like exopolysaccharide production; Propagation of starter cultures-concentrates - direct bulk and direct vat starter cultures, factors affecting propagation; Metabolism of starter cultures (carbohydrate, protein, citrate) and production of metabolites and antibacterial substances; methods of starter distillates their merits/demerits. <i>Activity, Purity, Preservation of Starters and Starter Failure:</i> Quality and activity tests for dairy starters and their preservation- methods (liquid, spray drying, vacuum drying, freeze-drying, frozen concentrate, concentrated dried cultures), merits and demerits; factors affecting the survival of cultures during preservation; Defects in starters and their control; Starter failures-effect of antibiotic residues, sanitizers and bacteriophages. Phages-life cycle, sources, prevention,</p>			

chemical and mechanically protected systems. *Role of Starters in fermented milks:* Role of starters in the preparation of various fermented milks; Types of fermented milks - dahi, yoghurt, acidophilus milk; different types of dahi and yoghurt; preparation; defects and their control. Kefir and koumiss origin and characteristics; microbiology of kefir grains; Other fermented milks such as Bulgarian milk, cultured buttermilk, Leben, Villi and Yakult; Microbiology of fermented milk products; their nutritional and therapeutic significance. *Cheese Starters:* Classification, desirable properties, Artisanal and adjunct cheese cultures, primary and secondary flora of cheese; biochemical changes during ripening, bacterial and mold ripened cheeses: soft, semi-soft, semi-hard, hard, Brick and Brie cheese, Camembert and Roquefort cheese; Rennet: rennet substitutes, microbial rennet and recombinant chymosin

### Practical

Testing purity of starter cultures by gram's staining, catalase test; creatine test. Testing starter activity by dye reduction tests, Horrall-Elliker, White Head & Cox test. Preparation of single and mixed starter cultures. Evaluation of homo-fermentation and hetero-fermentation separately and in combination. Preservation of starter cultures by freeze-drying techniques. Preparation of concentrated starter (DVS). Effect of physical factors (temperature, pH, Salt and Sugar) on dairy starters. Testing milk for presence of inhibitory substances using *B. stearothermophilus* and *S. thermophilus* as indicator organisms. Effect of presence of antibiotic residues in milk on starter activity. Evaluation of associative growth of Starter cultures in milk. Detection of Bacteriophages in cheese whey by plaque assay method. Preparation and microbial examination of dahi, yoghurt, cultured butter milk, acidophilus milk and kefir. Analysis of cheese for total spore and anaerobic spore count. Microbiological analysis of cheddar cheese at different stages of manufacture of (storage and ripening).

### Suggested readings

2. Farnworth, E.R. (2008). Handbook of Fermented Functional Foods. 2nd ed. CRC Press, USA.
3. Tamime, A.Y. and Robinson, R.K. (1999). Yoghurt Science and Technology, 2nd ed. Woodhead Publ. Ltd. and CRC Press LLC, USA.

3

BTAE0403

Condensed and Dried Milk

4(3+1)

### Theory

*Condensed Milks:* History, status and scope in India and abroad, Definition and legal standards: Condensed milk, sweetened condensed milk and evaporated milk, manufacturing techniques; a) Manufacture of evaporated milk including pilot sterilization test, b) Manufacture of sweetened condensed milk, c) Recombined sweetened condensed milk. Grading and quality of raw milk for condensed and evaporated milk, Physico-chemical changes taking place during manufacture of condensed milk, Heat stability of milk and condensed milk and role of stabilizers in the stability of condensed milk, Chemical defects in condensed milk, their causes and prevention. Recent advances with reference to freeze concentration and membrane concentration. *Dried Milks:* History and status in India and abroad, Grading and quality of raw milk for dried milks, Manufacture of skim milk powder (SMP), whole milk powders and heat classified powders, Physico-chemical changes taking place during manufacture of dried milks, Physical properties of dried milks, Defects in dried milk during manufacture and storage, their causes and prevention, PFA, BIS and International Standards for dried milk, Manufacture of infant foods, malted milk foods and other formulated dried products, Cheese spread powder, ice cream powder, cream powder, butter powder, whey powder, Management of condensed and dried milk industry.

### Practical

Manufacture of plain skim concentrated milk. Manufacture of Sweetened Condensed Milk. Manufacture of Evaporated Milk. Concentration of milk by membrane processing. Manufacturing of Skim

	Milk Powder by spray drying/roller drying. Manufacture of instant milk powder.	
	<p><b>Suggested Readings</b></p> <p>1.Tufail Ahmed: Dairy plant engineering &amp; management  2. H.G.Kessler: Food engineering and dairy technology  3.Sukumar De: Outlines of Dairy Technology</p>	
4	<b>BTDT0410</b>	<b>Quality and Safety Monitoring in Dairy Industry</b>
	<p><b>Theory</b></p> <p><i>Consumer Awareness about Microbiological Quality and Safety of Dairy Foods:</i> Changing scenario; Concepts of quality control, quality assurance and food safety; Global quality and food safety standards, Integrated food law, its main features and functions. <i>Introduction to Food Safety Management System:</i> Concepts of Quality Management System (QMS)–ISO: 9000:2000; Principles of QMS; Standard requirements for QMS; HACCP concept and principle with special reference to biological hazards in dairy foods, TQM tools and techniques. <i>Microbiological Risk Analysis Concepts:</i> Risk assessment, risk management and risk communication; risk profiling of dairy products; Microbiological criteria and two and three class sampling plan / guidelines; Bio safety concepts in handling of dairy pathogens and setting up of a microbiological/ pathogen lab in a dairy plant. <i>Rapid Enumeration Techniques:</i> Enumeration principles and procedure for rapid detection of predominant hygiene indicator organisms and pathogens like <i>E. coli</i> (<i>E. coli</i> O157:H7), <i>Salmonella</i>, <i>Shigella</i>, <i>Staphylococcus aureus</i>, <i>Bacillus cereus</i> and <i>Listeria monocytogenes</i>. <i>Role of Biosensors for monitoring hygiene and safety of dairy foods:</i> Detection of antibiotic residues in milk–Delvo SP, MDR test, penzyme test, charm assay, lateral flow assay (ROSA test) etc. Detection of aflatoxins, pesticides other inhibitors etc. and their public health importance in dairy foods. <i>Plant and equipment hygiene:</i> Concepts of hygiene and sanitation, microbial quality of water and environmental hygiene in dairy plant, chlorination of dairy water supply, quality of air, personnel hygiene, treatment and disposal of waste water and effluents.</p> <p><b>Practical</b></p> <p>Rapid detection of total plate count, yeast and mold counts, Coliform, <i>E. coli</i>, Enterococci, Entero bacteriae count using D- count and 3M Petrifilm kits. Rapid detection of pathogenic bacteria based on antigen antibody principle: <i>Staphylococcal enterotoxins</i>, <i>E. coli</i> O157:H7, <i>Listeriamonocytogenes</i> and <i>Salmonella</i> using VIDAS system. Rapid detection of antibiotic residues in milk using Delvo SP, MDR test, Charm assay, Lateral flow assay (ROSA test). Rapid detection of aflatoxin M1/ pesticides residues in milk using Charm Assay, Lateral Flow Assay (ROSA test) / Enzyme Inhibition Assay using Luminometer. Evaluation of common sanitizing agents used in dairy plants by a) suspension b) capacity test. Microbiological tests for assessing Environmental, equipment and personnel hygiene by swab and rinse methods. Determination of BOD in dairy waste water. Quality evaluation by HACCP in the preparation of dairy products.</p> <p><b>Suggested Readings</b></p> <p>1.Yasmine Motarjemi &amp; Huub Lelieveld: Food safety management  2.Dr. Adnan Y. Tamime: Milk processing and Quality management</p>	
5	<b>BTDT0411</b>	<b>Ice-Cream and Frozen Desserts</b>
	<p><b>Theory</b></p> <p>History, development and status of ice cream industry, History, development and status of ice cream industry, Definition, classification and composition and standards of ice cream and other frozen desserts, Stabilizers and emulsifiers-their classification, properties and role in quality of ice cream, Technological aspects of ice cream manufacture, Thermodynamics of freezing and calculation of refrigeration loads, Types of freezers, refrigeration control / instrumentation, Types of freezers, refrigeration control / instrumentation, Hygiene, cleaning and sanitation of ice cream plant, Effect of process treatments on the physico-chemical properties of ice-cream mixes and ice cream, Processing and freezing of ice-cream mix and control of over run, Packaging, hardening, storage and shipping of ice-cream, Defects in ice cream, their causes and prevention, Recent advances in ice-cream industry (flavourings, colourings, fat replacers, bulking agents) and plant management, Nutritive value of ice-cream.</p>	

	<p><b>Practical</b></p> <p>Calculation of standardization of ice-cream mixes. Manufacture of plain and fruit flavoured ice-cream. Manufacture of chocolate, fruit and nut ice cream. Preparation of sherbets/ices. Preparation of soft served and filled ice-cream. Manufacture of kulfi. Study of continuous and batch type freezers. Manufacture of ice-cream by continuous process. Determination of overrun in ice cream. Factory visit.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Arbuckle, W.S. 1991. Ice Cream. AVI Publ., Co. Inc., West Port, Connecticut.</li> <li>2. Hall, C.W. and Hedric, T.T. 1975. Drying of Milk and Milk Products. AVI Publ. Co. Inc., West Port, Connecticut. p-338</li> <li>3. Hui, Y.H. 1993. Dairy Science and Technology Handbook 2- Product Manufacturing. Wiley – VCH Inc., USA.</li> <li>4. Sommer, H. H. 1951. The Theory and Practice of Ice Cream Making. 6th ed. Madison, Wisconsin, p 5-10.</li> </ol>		
6	<b>BTDT0412</b>	<b>Chemistry of Dairy Products</b>	<b>3(2+1)</b>
	<p><b>Theory</b></p> <p>Chemical composition and legal standards of milk products. Chemistry of creaming and factors affecting the same. Ripening and neutralization of cream. Theories of churning and factors affecting the same. Butter colour. Ghee: Physico-chemical changes during manufacture. Hydrolytic and oxidative deterioration, their causes, prevention and role of antioxidants. Physico-chemical changes in milk constituents during manufacture and storage of traditional dairy products: Khoa, Paneer, Dahi, Channa, Lassi, Chakka, Shrikhand. Chemistry of cheese: milk clotting enzymes, enzymatic coagulation of milk, biochemical changes during ripening. Physico-chemical changes during preparation and storage of concentrated and dried milk products. Physico-chemical changes during processing and storage of ice cream and frozen desserts. Role and mechanism of stabilizers and emulsifiers in ice cream.</p> <p><b>Practical</b></p> <p>Cream: estimation of fat and acidity. Butter: estimation of fat, moisture, curd and salt content. Ghee: estimation of moisture, acid value, Butyro refractive reading and Reichert Meissl value / Polanske value. Determination of lactose and sucrose in sweetened condensed milk. Milk powder: moisture, fat, ash, solubility, acidity and bulk density. Ice cream: estimation of fat and total solids. Estimation of moisture, fat and salt content in cheese. Khoa/paneer: estimation of moisture and fat. Estimation of protein content in milk products and protein rich dairy products using Kjeldahl method.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Fox, P.F. (Ed). (1982). Developments in Dairy Chemistry. Applied Sci. Publ., New York.</li> <li>2. Fox, P.F. and Sweeny, Mc. (1998). Dairy Chemistry and Bio-Chemistry. Academic /Platinum Publ., New York.</li> <li>3. 2	<b>BTAS0402</b>	<b>Fundamentals of Dairy Extension</b>	<b>3(2+1)</b>
	<p><b>Theory</b></p> <p>History, need, definition, philosophy, principles, approaches and objectives of extension education. Present status of dairy and animal husbandry development programme launched in pre and post-independence era. Teaching and learning process, Extension Teaching Methods, classification and selection of teaching methods. Importance of Audio-Visual-Aids. Identification of rural leaders, their characteristics, role and function in rural development, training of rural leaders. Principle of working with group and their mobilisation. Need, principle and step of programme planning. Evaluation of extension programmes. Diffusion of innovations and categories of farmers. Problems of different stake holders, Conceptual orientation about different terms, like- RRA, PRA, IVLP/TAR, ATMA, ATIC, PTD, etc.</p>		

	<p><b>Practical</b></p> <p>Acquiring skill in use of audio-visual and other aids: Hands-on training on use of LCD projector, PA system, camera. Skills in preparation of documents including script writing, Preparation and use of audio-visual aids including animation for dairy stakeholders Group discussion technique, Hands on learning of field problems in dairy and animal husbandry.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1.Swanson, B.E. (Ed). 1984. Agricultural Extension: A Reference Manual. 2nd ed. FAO, Rome.</li> <li>2.Van den Ban, A.W. and Hawkins, H.S. (1998). Agricultural Extension. ### Semester-V

1	BTEC0401	Instrumentation and Process Control	3(2+1)
		<p><b>Theory</b></p> <p><i>Instrumentation scheme &amp; characteristics:</i> Measurands. Some basic discussion about electric field, potential, capacitance, resistance etc. Definition, Application and types of measurements, instrument classification, Functional elements of an instrument, standards, calibration, introduction to static characteristics and dynamics characteristics, selection of instruments, loading effects. Dynamic characteristics of measurement systems. <i>Introduction to various types of sensors:</i> Definition, principle of sensing &amp; transduction, classification, selection and applications of Sensors., Measurement of parameter : Measurement of length ,angle, area , temperature , pressure flow , speed, force , torque, vibration , level , concentration (conductivity and pH) measurement. Flow measurement using magnetic flow measurement. Piezoelectric transducer. <i>Micro-sensors and smart sensors:</i> Construction, characteristics and applications. <i>Electronic Instruments:</i> Role and importance of general purpose test instruments, Electronic Millimeter, Cathode Ray Oscilloscope, Measurement of amplitude, frequency and phase using CRO Advantages of digital meter over analog meters, Digital voltmeter, Resolution and sensitivity of digital meters, Digital multi-meter, Digital frequency meter, Signal generator. Display devices and recorders like X-Y &amp; X-T recorders. <i>Automation:</i> Introduction to plant automation, automation hierarchy, PLC, SCADA</p> <p><b>Practical</b></p> <p>Strain gauge characteristics and weight measurement. Measurement of pressure using bellows and diaphragm. Preparation and calibration of thermocouple. Study the construction and working of Bourden pressure gauge. Test and calibration of pressure gauges using dead weight tester. Study the mechanism of pH meter and its electrodes. Study a Proximity sensor. Study the different parts and working of pressure switch. Study the different parts of an indicating instrument. Study of RTD and Thermister. Study of different speed measurement sensor/ instruments. Study of LVDT. Study of level/flow controller. Study of PLC. Visit to an automatic controlled dairy plant.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1.Doebelin, E.O. 2003. Measurement systems – Application and Design. Tata McGraw-Hill, New Delhi.</li> <li>2.Gupta, J. B. 2003. A course in Electronic and Electrical Measurements. S. K. Kataria and Sons, New Delhi.</li> <li>3.Johnson, C. D. 1977. 2	BTDT0413	Cheese Technology	5(3+2)

	<p><b>Theory</b></p> <p>Origin and history of development of cheese manufacture, status and scope in India and abroad. Definition, standards and classification of cheese. Milk quality in relation to cheese making. Pre-treatment of milk; Physical and chemical. Additives and preservatives for cheese making. Rennet preparation and properties, rennet substitutes. Action of rennet on milk in relation to cheese making. Manufacture of different varieties of cheese: Cheddar, Gouda, Swiss, Mozzarella, Cottage. Enzyme modified cheese (EMC), flavorings, Application of membrane processing in cheese manufacture. Factors affecting yield of cheese. Packaging, storage and distribution of cheese. Accelerated ripening of cheese. Manufacture of processed cheese, cheese spread and processed cheese foods. Mechanization and automation in cheese processing.</p> <p><b>Practical</b></p> <p>Familiarization with equipments, accessories and standardization numerical. Study of factors affecting rennet action. Manufacture of Cheddar cheese. Manufacture of Gouda cheese. Manufacture of Mozzarella cheese. Manufacture of Swiss cheese. Manufacture of Cottage cheese. Manufacture of Processed cheese. Manufacture of Processed cheese spread. Manufacture of processed cheese food.</p> <p><b>Suggested Readings</b></p> <p>1. Banks, J.M. (1998). The Technology of Dairy Products. 2nd ed. R. Early (Ed.), Chapman and Hall, Blackie Academic and Professional, London</p> <p>2. Y.H.Hui: Dairy science and Technology Handbook</p>		
3	<b>BTDT0414</b>	<b>By Products Technology</b>	<b>3(2+1)</b>
	<p><b>Theory</b></p> <p>Status, availability and utilization of dairy by-products in India and Abroad. Associated economic and pollution problems, Physico-chemical characteristics of whey, butter milk and ghee residue, <i>By-products from skim milk: Casein</i>: types of commercial casein, their specifications, manufacturing processes with basic principles involved. b) Industrial and food uses of caseins c) Manufacture of sodium and calcium caseinates their physico-chemical and functional properties and food applications d) Manufacture of casein hydrolysates and its industrial application e) <i>Co-precipitates</i>: types, their specifications, manufacturing processes with basic principles involved, functional properties and food applications. <i>Whey processing</i>: a) Fermented products from whey, b) Beverages from whey c) Deproteinized and demineralized whey d) Condensed whey</p> <p>Dried whey, types and their specification, manufacturing techniques. F) Utilization of whey products. Application of membrane processing for whey processing. <i>Whey protein concentrates</i>: a) Methods of isolation with basic principles involved, physico-chemical properties of whey proteins concentrates b) Functional properties and food applications of WPC. <i>Lactose</i>: methods for the industrial production of lactose, refining of lactose, uses of lactose and hydrolysis of lactose. Butter milk processing: a) Condensed butter milk b) Dried butter milk c) Utilization of butter milk products. <i>Ghee residue</i>: Composition, processing and utilization. Nutritional characteristics of by products.</p> <p><b>Practical</b></p> <p>Manufacture of edible casein from cow and buffalo milk. Manufacture of rennet casein. Manufacture of sodium caseinate. Manufacture of calcium caseinate. Manufacture of co-precipitate. Isolation of whey proteins by cold precipitation technique. Manufacture of whey proteins, concentration by ultra-filtration process. Manufacture of whey drinks. Manufacture of dried whey. Manufacture of lactose. Incorporation of whey protein concentrates in processed cheese foods. Manufacture of coffee whitener.</p> <p><b>Suggested Readings</b></p> <p>1. Caric, M. 1994. Concentrated and Dried Dairy Products. VCH Publishers, Inc., New York.</p> <p>2. Webb, B.H. and Whittier, E. O. 1970. By-products from Milk. 2nd ed. AVI Publishing Company, Inc., Westport (Connecticut), USA.</p> <p>3. Zadow, J. G. 1992. Whey and Lactose Processing. Elsevier Applied Science, London.</p>		
4	<b>BTAE0404</b>	<b>Packaging of Dairy Products</b>	<b>3(2+1)</b>
	<p><b>Theory</b></p> <p>Introduction, Importance of Packaging, History of Package Development, Packaging materials,</p> <p>a) Characteristics of basic packaging materials: Paper (paper board, corrugated paper, fibre board), Glass,</p>		

	<p>Metal, Plastics, Foils and laminates, retort pouches, Package forms, Legal requirements of packaging materials and product information. Packaging of milk and dairy products such as pasteurized milk, UHT-sterilized milk, aseptic packaging, fat rich products-ghee and butter, coagulated and desiccated indigenous dairy products and their sweet mead, concentrated and dried milks including baby foods. Packaging of functional dairy/food products. Modern Packaging Techniques; Vacuum Packaging, Modified atmosphere packaging (MAP), Eco-friendly packaging, Principles and methods of package sterilization, Coding and Labelling of Food packages, Aseptic Packaging (AP), Scope of AP and pre-requisite conditions for AP, Description of equipments (including aseptic tank) and machines- Micro-processor controlled systems employed for AP, Package conditions and quality assurance aspects of AP, Microbiological aspects of packaging materials. Disposal of waste package materials, Packaging Systems. Hazards from packaging materials in food</p> <p><b>Practical</b></p> <p>Identification of packaging materials, Flame Hot wire test, Testing of papers/ paperboards: Percentage moisture, Grease resistance, Water absorptiveness, Grammage, Tearing resistance, Bursting strength. Testing of glass bottle – resistance to thermal shock. Testing of plastics and laminates – Thickness, Water vapour transmission rate (WVTR), Grease resistance. Packaging of different dairy products by using prepack and vacuum packaging machines.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1.Ahvenainen, R. (2003). Novel Food Packaging Techniques. Woodhead Publ. Ltd., Cambridge, England.</li> <li>2. Engineers India Research Institute. (2005). Handbook of Packaging Technology. EIRI, Delhi.</li> <li>3.Han, J. (2005). Innovations in Food Packaging. Elsevier Science &amp; Technology Books.</li> <li>4. Yam, K. L. (2009). Encyclopedia of Packaging Technology. 3rded. John Wiley and Sons, Inc. Publ., USA.</li> </ol>		
5	<b>BTDT0415</b>	<b>Chemical Quality Assurance</b>	<b>2(1+1)</b>
	<p><b>Theory</b></p> <p>Importance of chemical quality control, quality assurance and total quality management in dairy industry. Role of national and international food regulatory systems and standards with respect to quality and safety of milk and milk products: FSSAI, PFA, AGMARK, BIS ISO, IDF, Codex, etc., Application of food safety management system (ISO: 22000). Hazard analysis and critical control points (HACCP) system and its application in dairy industry with respect to chemical quality. Setting up of testing facilities and analytical laboratories; concept of mobile testing laboratories. Accreditation of analytical laboratories. Preparation and standardization of reagents required in the analysis of milk and milk products. Sampling procedures; labeling of samples for analysis; choice of analytical tests for milk and milk products for chemical analysis and instrumental methods of analysis. Calibration of dairy glassware; including butyrometer, pipettes, burettes, hydrometers, lactometers and thermometer. Testing methods for the detection of adulterants, preservatives and neutralizers in milk and milk products. Environmental contaminants such as pesticides, antibiotics, heavy metals in milk and milk products and their chemical testing methods. Importance of milk contact surfaces, metallic contamination in dairy industry. Chemical quality of water in dairy industry. Prediction of shelf life behavior of milk and milk products.</p> <p><b>Practical</b></p> <p>Calibration of dairy glassware such as pipette, burette, volumetric flasks, hydrometer, butyrometers. Preparation and standardization of dairy reagents such as acids, alkalis, sodium thiosulfate, silver nitrate, Fehlings, EDTA solutions etc. Preparation and testing of Gerber sulfuric acid used in fat determination. Testing the amyl alcohol used for fat determination. Chemical analysis of permissible additives used in milk and milk products. Chemical analysis of detergents and sanitizers. Detection of adulterants, preservatives, and neutralizers in milk and milk products. Detection of vegetable oils and animal body fat adulteration in ghee. Analysis of market samples of milk and milk products. Determination of temporary and permanent hardness of water. Estimation of available chlorine from bleaching powder.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1.Alli, I. (2004). Food Quality Assurance: Principles and Practices. CRC Press, Boca Raton, USA.</li> <li>2.Herschdoerfer, S.M. (2004). Quality Control in the Food Industry. Vol. I &amp; II. Academic Press, London.</li> <li>3.Jacobs, M.B. (1999). Chemical Analysis of Food and Food Products. CBS Distributors, New Delhi.</li> <li>4.Kramer, A. and Twigg, B.A. (Eds) .(1966). Fundamentals of Quality Control for the food industry, The AVI</li> </ol>		

	Publ. Co., West Port, Conn., USA.		
6	<b>BTMG0401</b>	<b>ICT in Dairy Industry and Introduction to Operations Research</b>	<b>4(2+2)</b>
	<p><b>Theory</b></p> <p>Introduction–Elementary concepts, objectives of operations research, Applications of OR in decision-making. Modeling in Operation Research. Linear Programming: Introduction, mathematical formulation of the problem, Graphical solution, Simplex technique for solving simple LP problems. Inventory Control – Introduction and general notations, Economic lot size models with known demand. Replacement – Introduction, Replacement of items whose efficiency deteriorates with time. Queuing – Introduction and general notions, Classification of queues and their problems, Probability distribution of queues. Various models in the queuing system. Sequencing – Statement of the problem, notations and assumptions, Problems with ‘n’ jobs and two machines. Generalization to ‘m’ machines. Transportation model – Definition and application of transportation model, Formulation of transportation problems and their solutions. Assignment problems and their solutions. Framework of PERT and CPM, Activities, events and network, PERT and activity time estimates, probability of project completion Critical path analysis.</p> <p><b>Practical</b></p> <p>LP problems, Inventory Control problems, Replacement model problems, problems on queuing theory, sequencing, transportation, assignment, PERT/CPM.</p> <p><b>Suggested Readings</b></p> <p>1.Prem kumar gupta.Dr.D.S.Hira &amp; Aarti Kamboj: Introduction to operation research 2.V.C.Pandey:Information communication technology &amp; Education</p>		
7	<b>BTAE0405</b>	<b>Dairy Plant Design And Layout</b>	<b>2(1+1)</b>
	<p><b>Theory</b></p> <p><i>Introduction of Dairy Plant design and layout:</i> Type of dairies, perishable nature of milk, reception flexibility. Classification of dairy plants, Location of plant, location problems, selection of site. Hygienic design considerations for dairy processing plants. <i>Planning:</i> Dairy building planning, Process schedule, basis of dairy layout, importance of planning, principles of dairy layout. Space requirements for dairy plants, estimation of service requirements including peak load consideration. <i>Dairy plant design aspects:</i> General points of considerations for designing dairy plant, floor plant types of layouts, service accommodation, single or multilevel design. Arrangement of different sections in dairy, sitting the process sections, utility/service sections, offices and workshop. Arrangement of equipment, milk piping, material handling in dairies, Common problems, office layouts-flexibility. Development and presentation of layout, model planning, and use of planning table in developing plot plant and detailed layout. <i>Building construction materials:</i> Floors, general requirement of dairy floor finishes, floors for different section of dairy. Foundations, walls doors and windows. <i>Other design aspects:</i> Drains and drain layout for small and large dairies. Ventilation, fly control, mold prevention, illumination in dairy plants. <i>Computer aided Design:</i> Introduction to CAD software.</p> <p><b>Practical</b></p> <p>Building symbols and convention. Symbols for equipments. Study of process schedule. To draw layout of collection/chilling center. Visit to dairy processing plant for understanding of layout of different sections. To draw layout of small dairy plant. To draw layout of small dairy plant using CAD. To draw layout of medium dairy plant. To draw layout of large dairy plant. To draw layout of cheese plant. To draw layout of ice-cream plant. To draw layout of butter manufacturing unit. To draw layout of ghee plant. To draw layout of composite dairy plant</p> <p><b>Suggested Readings</b></p> <p>1.Chander, L. 2004. Dairy Plant Layout and Design. Directorate of Information and Publ. of Agriculture</p>

### Semester-VI

1	BTAE0406	Food Engineering	3(2+1)
	<p><b>Theory</b></p> <p>Rheology: Rheology of processed food, properties of fluid foods, Rheological method, Measurement of rheological parameters, properties of granular food and powders, Properties of solids foods, Viscoelastic models. Measurement of food texture. Food Freezing: Thermal properties of frozen foods. Predication of freezing rates. Plank's equation, Design of food freezing equipment, Air blast freezers, Plate freezers, spiral freezers, and immersion freezers, IQF, storage of frozen foods. Freeze concentration. Food dehydration: Estimation of drying time for food products, constant rate period and falling rate period dehydration. Diffusion controlled falling rate period. Use of heat and mass balanced in analysis of continuous dryers, Classification of driers, tray, vacuum, vacuum band, tunnel, bin, solar, drying, freeze drying, spin flash. Freeze dehydration: Heat and mass transfer, Calculation of drying time, Industrial freeze drying. Other food processing operations and equipments: Equipment for pulping, fruit juice extraction, blanching, de-hulling, size reduction, milling, extrusion and distillation.</p> <p><b>Practical</b></p> <p>To determine physical properties of food product. To determine viscosity of food product. To study food freezers. To study freeze drier. To determine drying characteristics of food product. To compare various drying methods. To determination juice yield. To compare hot water and steam blanching. To study construction and working of distillation system. To study various size reduction equipments. Visit to cold storage. Visit to food processing plant.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. R. Paul Singh, Dennis R. Heldman: Introduction to Food Engineering</li> <li>2. S. N. Mukhopadhyay Food Engineering : Process and Technology</li> </ol>		

2	BTME0407	Material Strength & Dairy Machine Design	3(2+1)
<p><b>Theory</b></p> <p><i>Strength of Materials:</i> Basic concepts in Statics and Dynamics. Force Systems. Equilibrium condition, friction, Law of friction, Second moments of inertia, Parallel axis theorem. Dynamics: Equation of motion. Translation and rotation of a Rigid body, work and mechanics of materials: Stress-Axial Load classification Strain-Hooke's law, stress-strain diagram, Poisson's Ratio: Shearing Stresses. Torsion, Torsion formula, Angle to Twist of circular members. Power transmission shear force and bending moments, Shear in Beams, Bending Moment in beams. Pure bending of beams, Flexural stress shearing stresses in beams relations between center, Torsional and flexural loads. <i>Dairy Machine Design:</i> Procedures, Specification, strength, design factor, factor of safety selection of factor of safety. Materials and properties. Static strength, ductility, hardness, fatigue, designing for fatigue conditions. Theories of failure, Stresses in elementary machine parts, Design of a drive system. Design of length and thickness of belt. <i>Bearing:</i> Journal and Anti-friction bearings. Selection of ball, tapered roller and thrust bearing. Springs, helical and leaf springs. Energy stored in springs. Design and selection of springs.</p> <p><b>Practical</b></p> <p>Design problems on applications of engineering statics and dynamics. Design problems on applications of work and energy. Design problems on applications of linear and angular momentum. Design problems on stress-strain diagram evaluation of elastic constants. Study on shear force and bending moment diagrams and its applications. Design problems on applications of flexural stresses. Design problems on applications of shearing stresses in beams. Study on system of limits, fits and tolerances and their applications. Design stresses in elementary machine parts. Design features and applications of shafts. Design features and applications of axles. Design features and applications of keys. Design features and applications of couplings. Design problems on various types of power transmission systems. Design features and applications of bearings. Design features and applications of springs. Design problems on agitator/stirrer. Design features of milk silo.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. Bhavakatti, S.S. 1994. Engineering Mechanics. New Age International Private Limited, New Delhi.</li> <li>2. Timoshenko, S.P. and Goodier, J.N. 1985. Theory of Elasticity. Tata McGraw-Hill. New York.</li> <li>3. Rmamrutham, S. 2008. Strength of Materials. Dhanpat Rai Publications, New Delhi.</li> <li>4. Bhandari, V.B. 1994. Design of Machine Elements. Tata McGraw-Hill, New Delhi.</li> <li>5. Khurmi, R.S. and. Gupta, J.K. 1984. 3	BTMG0102	Marketing Management and International Trade	2(2+0)
<p><b>Theory</b></p> <p>Concept of marketing; Functions of marketing; concepts of marketing management; scope of marketing management; marketing management. Process; concepts of marketing- mix, elements of marketing- mix. Market Structure and Consumer Buying Behaviour: Concept of market structure, marketing environment, micro and macro environments. Consumers buying behavior, consumerism. Marketing Opportunities Analysis: Marketing research and marketing information systems; Market measurement-present and future demand; Market forecasting; market segmentation, targeting and positioning. Allocation and marketing resources. Marketing Planning Process. Product policy and planning: Product-mix; product line; product life cycle. New product development process. Product brand, packaging, services decisions. Marketing channel decisions. Retailing, wholesaling and distribution. Pricing Decisions. Price determination and pricing policy of milk products in organized and unorganized sectors of dairy industry. Promotion-mix decisions. Advertising; How advertising works; Deciding advertising objectives, advertising budget and advertising message; Media Planning; Personal Selling, Publicity; Sales Promotion. Food and Dairy Products Marketing. International Marketing and International Trade. Salient features of International Marketing. Composition &amp; direction of Indian exports; Trends ion International Dairy Trade, International marketing environment; Deciding which how to enter international market; Exports- Direct exports, indirect exports, Licensing, Joint Ventures, Direct investment &amp; internationalization process, Deciding marketing Programme; Product, Promotion, Price, Distribution Channels. Deciding the Market Organization; World Trade Organization (WTO)</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1.Philip Kotler &amp; Kevin Lane Keller: Marketing management</li> <li>2.U.C.Mathur:International marketing management</li> </ol>			
4	BTAE0407	Food and Industrial Microbiology	3(2+1)
<p><b>Theory</b></p> <p><i>Scope of food microbiology:</i> Basic aspects, history and scope of food microbiology. Intrinsic and extrinsic factors that affect microbial growth in different foods.</p> <p><i>Microbial Spoilage of foods:</i> Microbial spoilage of fruits, fruit juices, vegetables, cereals, meat, poultry, sea foods, carbonated soft drinks, canned foods; Sources of contamination; Control of spoilage. <i>Food preservation:</i> Principles of food preservation: physical methods viz. low temperature and high temperature preservation (D, Z and F Values); Drying Methods; Chemical preservatives, Natural antimicrobial compounds and bio- preservation; Mode of action of various preservation methods on microbes. <i>Fermentation processes:</i> Fermentation processes : Historical development, the range, components and types (i.e. submerged, surface and solid state fermentation); criteria for selection of industrially important microorganisms; preservation and improvement of industrially important micro-organisms using metabolic engineering/genetic engineering; media for industrial process; upstream and downstream processing. <i>Types of fermenters:</i> Fermenters: types (batch, fed batch and continuous), functions, design and control; sterilization; growth rate analysis, estimation of biomass; difference in chemostat and turbidostat. <i>Microbial production of industrial products:</i> Immobilization of enzymes/cells; Microorganisms and processes involved in the production of single cell protein and industrial alcohol, beer and wine; organic acids (citric and lactic), enzymes (protease, lipase and rennet), vitamin (B<sub>12</sub>), antibiotics and bacteriocins; and fermented whey beverages.</p> <p><b>Practical</b></p> <p>Microbiological examination of: 1) fresh and canned fruits, vegetables and juices; 2) flour and bread; and 3) eggs and meat. Isolation of psychrophilic, salt and sugar tolerant microorganisms from foods. Isolation of industrially important microorganisms from environment. Determination of Z, D and F values. Production and assaying of microbial enzymes (protease/ lipase). Production of lactic acid from whey. Production of nisin and assaying the antimicrobial activity of the culture. Design and control of a table-top and 10 liter lab fermenter (Demonstration). Production of ethyl alcohol from molasses and whey by yeasts. Production of fermented whey beverages. Educational tour to food processing/ fermentation industries.</p>

**BTDT0416****Sensory Evaluation of Dairy Products****3(2+1)****Theory**

Introduction, definition and importance of sensory evaluation in relation to consumer acceptability and economic aspects. Terminology related to sensory evaluation. Design and requirements of a sensory evaluation laboratory. Basic principles: senses and sensory perception. Physiology of sensory organs. Classification of tastes and odours, threshold value. Factors affecting senses, visual, auditory, tactile and other responses. Fundamental rules for scoring and grading of milk and milk products. Procedure and types of tests – difference tests (Paired comparison, due-trio, triangle) ranking, scoring, hedonic scale and descriptive tests. Panel selection, screening and training of judges. Requirements of sensory evaluation, sampling procedures. Factors influencing sensory measurements. Milk: score card and its use. Judging and grading of milk, defects associated with milk. Cream: desirable attributes and defects in cream, Score card for cream, sensory evaluation of different types of cream. Butter: Specific requirements of high grade butter, undesirable attributes of butter, butter score-card, sensory evaluation of butter. Ghee: grades of ghee, special requirements of quality ghee, defects in ghee, sensory evaluation of ghee. Fermented milks: desirable and undesirable characteristics of fermented milks, sensory evaluation of dahi, yoghurt, chakka, srikhand, lassi and other fermented drinks. Frozen dairy products: desirable and undesirable characteristics of frozen dairy products. Sensory evaluation of ice cream, kulfi and milk sherbets. Cheese: sensory Quality attributes of some common cheese varieties and their defects, score card for cheese. Sensory evaluation and grading for cheddar, cottage and other varieties of cheeses. Dried dairy products: desirable and undesirable characteristic of dried milks. Sensory evaluation and grading of dry milk products. Concentrated milks: desirable attributes and defects. Sensory evaluation and grading of evaporated and condensed milk. Heat desiccated Indian milk products: desirable and undesirable characteristics. Sensory evaluation of khoa and khoa based sweets. Acid coagulated Indian milk products: desirable and undesirable characteristics. Sensory evaluation of paneer, chhana and chhana based sweets. Consumer acceptance studies: Objectives, methods, types or questionnaires, development of questionnaires, comparison of laboratory testing and consumers studies, limitations. Interrelationship between sensory properties of dairy products and various instrumental and physico-chemical tests.

**Practical**

Determination of threshold value for basic tastes. Determination of threshold value for various odours. Selection of sensory evaluation panel. Training of judges, for recognition of certain common flavour and texture defects using different types of sensory tests. Sensory evaluation of milk and cream. Sensory evaluation of butter and ghee. Sensory evaluation of condensed and evaporated milk. Sensory evaluation of milk powders. Sensory evaluation of cheese and related products. Sensory evaluation of frozen products. Sensory evaluation of khoa and khoa-based sweets. Sensory evaluation of chhana and chhana based sweets. Sensory evaluation of dahi and fermented dairy products. Preparation of milk and milk products with defects, techniques for simulation. Novel techniques of sensory evaluation.

1. Michael O Mahony: Sensory evaluation of food

2. Harry T. Lawless: Laboratory exercises in sensory evaluation

6	BTAE0408	Food Technology-I	Page 3(2+1)
<p><b>Theory</b></p> <p>Status of food processing industries in India and abroad, magnitude and inter- dependence of dairy and food industry, prospects for future growth in India. Harvesting, transportation and storage of fruits and vegetables. <i>Post-harvest processing of fruits and vegetables:</i> Peeling, sizing, blanching, Canning of fruits and vegetables, Drying and freezing of fruits and vegetables. <i>Juice processing:</i> General steps in juice processing, role of enzymes in fruit. Juice extraction, equipments and methods of fruit juice extraction, preservation of fruit juices, fruit juice clarification, concentration of fruit juices, fruit juice powders. Fruit juice processing; Orange and tangerine, Lemon and lime juice, Apple juice, Grape juice, Nectars, pulpy juices, tropical blends, Vegetable juices. <i>Manufacture of Jam, Jelly and Marmalade:</i> Role played by pectin, sugar and acid in jellied fruit products. Fruits and vegetable preserves, Glazed, Crystallized fruits. Tomato based products: Juice, puree, paste, sauce, ketchup. Pickles: Principle of pickling, technology of pickles. <i>Beverages:</i> Classification, scope, carbonated non-alcoholic beverages and their manufacture. Fruit beverages and drinks, additives for fruit based beverages. <i>Coffee:</i> Production practices, structure of coffee/cherry, Coffee processing including roasting, grinding, brewing extraction, dehydration, aromatization, instant coffee. <i>Tea:</i> Tea leaf processing, green, red, yellow, instant tea. <i>Technology of confectionery foods:</i> Candies, Chewing gums and bubble gums, Toffees, Caramels, Standards of confectionery products. <i>Chocolate products:</i> Cocoa bean processing, chocolate liquor, Standards of confectionery products. <i>Functional foods:</i> Introduction, Phytochemicals, Milk ingredients as nutraceuticals, fiber-rich food products etc.</p> <p><b>Practical</b></p> <p>Manufacture of toffees and caramels, Testing the efficacy of blanching process, Drying of fruits and vegetables, Preparation of fruit based drinks and beverages: Ready-to-serve drink, Nectar, Squash, Whey-fruit based beverages. Manufacture of fruit jam. Manufacture of fruit jelly. Manufacture of chocolate confections. Manufacture of tomato ketchup/tomato sauce. Manufacture of soups. Manufacture of fruit preserve. Manufacture of candied fruits. Manufacture of fruit bar; Manufacture of pickles</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. N. Shakuntala Manay&amp; M.Sadaksharaswamy. Food: Facts and Principles</li> <li>2.Fellows, P. J. (2009). Food Processing Technology: Principles and Practice. 3rd Edition. CRC Woodhead Publishing, Boca Raton (USA).</li> <li>3. Er. B. Pantastico. (1975). Post Harvest physiology, handling, and utilization of tropical and sub-tropical fruits and vegetables. AVI Publishing Co. Westport Conne.</li> </ol>			
7	BTAE0409	Food Chemistry	3(2+1)
<p><b>Theory</b></p> <p>Water: Water binding and chemical reaction mediated by water. Food proteins: Classification and physico-chemical and structural properties. Lipids: Definition, classification of lipids, Un-saponifiable matter contents in various fats and oils, classification and chemical composition. Carbohydrates: Classification of carbohydrates, polysaccharides, viz. linear, branched and modified. Properties and utilization of common polysaccharides, viz. cellulose, glycogen, hemicelluloses, pectin. Food Enzymes: Hydrolases and lipases, utilization in food chemistry. Minerals in foods: Main elements, trace elements in eggs, cereals and cereal products, vegetables and fruits. Aroma compounds in foods: Threshold value, off-flavours. Food additives: Vitamins and Amino acids, Minerals, Aroma Substances/flavour enhancers- Monosodium glutamate, 5-nucleotides sugar substitutes, sorbitol sweeteners- saccharin, and cyclamate, Food colours and food preservatives. Anti-nutritional factors and Food contaminants: Toxic trace elements, radio nucleotides. Cereal and cereal products: Individual constituents like proteins, lipids, carbohydrates and vitamins in cereals flour and their relationship in dough making, influence of additives /minor ingredients on baking properties:</p>			

	<p>Balance in Unit Operations and System boundaries. Solving examples on energy balances. Solving problems on electrical energy use and management: Connected load, Maximum demand, Demand factor and Load curve. Determination of Load factor of an installation. Study of use of power factor meter and determination of true power and wattles power using pf meters, Watt meter, Ammeter and Volt meter. Study of performances of a general type of induction motor and an energy efficient induction motor. Study of use of VSD. Study of various types of electrical appliances classified under different BEE Star Ratings. Drawing Energy Balance on a boiler: Collection of data, Analysis of results and determination of efficiency. Exercise on energy audit of Students Experimental Dairy Plant (SEDP-DSc College, Hebbal).</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1.Wayne C.Turner: Energy management handbook</li> <li>2.Suresh kumar Soni &amp; Manoj Nair:Energy conservation and management</li> </ol>

2	<b>BTCM0401</b>	<b>Waste Disposal and Pollution Abatement</b>	<b>2(1+1)</b>
<p><b>Theory</b></p> <p><i>Wastes discharged from dairy plants:</i> An overview. Wastewater discharged from a) Milk reception dock b) Liquid milk processing section, c) Butter and ghee manufacturing, d) Ice-cream and condensed milk manufacturing, e) Milk powder manufacturing, f) Cheese and paneer manufacturing. Packaging wastes. <i>Environmental issues in effluent discharge:</i> a) Effects on waterways, b) Effects on land c) Effects on the atmosphere d) Solid waste. <i>Waste treatment process in a dairy processing plant:</i> Wastewater treatment options for A Dairy Processing Plant. Calculation of wastes discharged and the economics thereof.</p> <p><b>Practical</b></p> <p>Waste Utilization processes. Various treatments in waste disposal. Analysis of cleaning agents and sanitizers. Reports and records maintenance of dairy plant. Operational precautions. CIP cleaning.</p> <p><b>Suggested Readings</b></p> <p>1. Yung-Tse Hung, Lawrence K Wang &amp; Nazih K Shammam: Handbook of Environment and Waste Management 2. J. Jeffrey Peirce, P Aarne Vesilind &amp; Ruth Weiner: Environmental pollution and control</p>			
3	<b>BTAE0411</b>	<b>Food Technology-II</b>	<b>3(2+1)</b>
<p><b>Theory</b></p> <p><i>Cereal grains, legumes and oilseeds:</i> Structure and composition of cereals, legumes and oilseeds, Milling of paddy, quality factors of rice grains, processing of rice bran oil, Instant rice, quick cooking rice, canned rice, Milling technology of wheat, Criteria of wheat flour quality, improvers for wheat flour, Types of wheat flour, Milling technology of maize, wet milling of corn, Milling technology of barley, malting of barley and its utilization in manufacture of value added food products including malted milk foods, Dehulling and processing technology of important pulses, Dehulling and extraction of oil in major oilseed crops like soy bean, mustard, sunflower, ground nut, Vegetable protein concentrates/isolates, Utilization of oil cake in food formulation. <i>Bakery and Snack technology:</i> Technology of bread, biscuits, crackers and cakes, Technology of manufacturing process of Pasta foods- Macaroni, Noodles and Spaghetti, Technology of breakfast cereals: corn flakes, puffed, extruded snacks, Potato chips. <i>Meat, fish and egg technology:</i> Development of meat, poultry, egg and fish industry in India, Pre-slaughter care, handling and ante-mortem inspection of animal, Stunning and slaughtering techniques, Postmortem inspection, rigor mortis and conversion of muscle to meat Slaughterhouse sanitation, meat hygiene and zoonotic diseases, Processing of poultry meat, Egg and egg products – quality assessment of egg, Types, handling, transportation and marketing of fish, Preservation of fish. Manufacturing process of dehydrated fish and fish pickles. Cleaning and sanitation, Waste management of food processing plants.</p> <p><b>Practical</b></p> <p>Manufacture of barley malt. Determination of cooking quality of rice. Manufacture of bread and bun. Manufacture of biscuits. Preparation of noodles. Preparation of cake. Manufacture of potato chips. Preparation of malt based food products. Manufacture of malted milk foods, Manufacture of soy beverage and tofu, Preparation of salami. Preparation of chicken soup. Manufacture of chicken pickle.</p> <p><b>Suggested Readings</b></p> <p>1. Kulp, K. and Ponte, J.G.Jr. (2000) Handbook of Cereal Science and Technology, 2nd Edition, Marcel Dekker, Inc., New York, USA. 2. Hosney, R.C., Wade, P. and Finely J.W. (1988) Soft Wheat Products, In: Wheat Chemistry and Technology, 3rd Ed. (Y. Pomeranz, ed.) American Association of Cereal Chemists, St. Paul, MN. 3. Dhillon, L.S. (2005) Manufacturing of malt- milk based food products. Indian Dairyman, 57: 59-66.</p>			

4	<b>BTMG0103</b>	<b>Entrepreneurship Development and Industrial Consultancy</b>	<b>2(2+0)</b>
<p><b>Theory</b></p> <p><i>Entrepreneurship Development:</i> Assessing overall business environment in the Indian economy. Overview of Indian social, political and economic systems and their implications for decision making by individual entrepreneurs. Globalisation and the emerging business/ entrepreneurial environment. Concept of entrepreneurship; entrepreneurial and managerial characteristics; managing an enterprise; motivation and entrepreneurship development; importance of planning, monitoring, evaluation and follow up; managing competition; entrepreneurship development programs; SWOT analysis, Generation, incubation and commercialization of ideas and innovations. Government schemes and incentives for promotion of entrepreneurship. Government policy on Small and Medium Enterprises (SMEs)/SSIs. Export and Import. Policies relevant to dairy sector. Venture capital. Contract farming and joint ventures, public-private partnerships. Overview of dairy inputs industry. Characteristics of Indian dairy processing and export industry. Social Responsibility of Business. <i>Industrial Consultancy:</i> Dairy plant management system- milk procurement from the rural milk producer, milk processing and products manufacturing. Pricing and marketing of milk and milk products. Survey on milk production potential and marketed surplus of milk for setting up of milk plants. Recruitment and training of manpower, Estimation of costs of product manufacture and energy utilization in food processing plants. Sources of finance for setting up of dairy farms and processing plants/ units. Guidelines for obtaining ISO/HACCP certification for dairy plants. Assessment of entrepreneurial skills and characteristics for successful entrepreneur. Consumer opinion surveys. Pricing of milk and milk products. Preparation of feasibility reports for setting of dairy farms, composite milk plants, collection centers, chilling units and processing units.</p> <p><b>Suggested Readings</b></p> <ol style="list-style-type: none"> <li>1. The oxford Handbook of Management consulting.</li> <li>2. Yakov Fain, Victor Rasputnis &amp; Anatole Tarlakovsky: Enterprise development with flex</li> </ol>			
5	<b>BTMG0404</b>	<b>Financial Management and Cost Accounting</b>	<b>3(2+1)</b>
<p><b>Theory</b></p> <p><i>Introduction:</i> Definition, scope and objectives of financial management. Different Systems of Accounting: Financial Accounting, Cost accounting, Management Accounting. Doubles entry system of Book-Keeping. Preparation of Accounting Records: Journal, Purchases and Sales Book and Posting in Ledger, Cash Book. Preparation of Final Accounts and adjustments at the end of trading period. Preparation of Trial Balance Banking Transactions and Bank reconciliation statements. Statements of Financial Information: Accounting system: A source of financial statements, Classification of capital and revenue expenditure, Balance Sheet, Profit and Loss Account, Statement of changes in the financial position, funds flow statements, cash flow statement, uses of funds flow and cash flow statements in financial decision making. <i>Financial Analysis:</i> Nature and uses of financial analysis, Liquidity ratios, Leverage ratios, Activity ratios, Profitability ratios, Utility of Ratio analysis. Cost Volume – Profit analysis and operating leverage, Break-even analysis, Profit analysis and operating analysis, Utility of CVP analysis. Capital Structure: C.S Planning, risk return trade off, financial leverage. Cost of capital: Management of cost of capital, cost of debt, debentures, preference share capital, equity share capital &amp; retained earning, overall cost of capital. <i>Investment decision:</i> Time value of money, Net present value, Investment evaluation criteria, NPV method, Internal rate of return method, Profitability index method, Pay back period method, Accounting rate of return method. Capital budgeting: Complex Investment Decisions: Investment timing &amp; duration Investment decisions under inflation, Investment decisions under capital rationing. <i>Project Report;</i> Feasibility Report Valuation. Working capital management-Concept &amp; determinants of working capital, Estimating working capital needs. Depreciation – Concept and method. Introduction, Definition, Objectives, Common terms. <i>Costing:</i> Essentials of sound costing system. Different methods of costing,</p>			

	<p>elements of cost: Labour- recording of time, idle time, methods of remunerating labour, Premiums &amp; Bonus Plans, Materials, Overheads. <i>Cost classification:</i> Direct and Indirect expenses, fixed and variable costs. Various methods of apportioning indirect expenses. Inventory Management: Planning, control and costing. Stores: storekeeping, scope &amp; importance, purchase procedure, types of purchase, location of stores materials, procedure for the movement of stores, different methods of pricing materials, store records. Cost Sheets-Different methods, Statement of cost and statement of profit estimates, Tenders or Quotations. Contract or Terminal costing. Process Costing: Process losses and inter-process profits, joint products and by products costing. Ascertainment of cost of milk production. Preparation of Cost Account Information for managerial decisions.</p> <p><b>Practical</b></p> <p>Preparation of Profit and Loss account. Preparation of Balance Sheet. Preparation of Cash flow statements. Preparation of Funds flow statements. Problems on Ratio analysis. Problems on Break-Even Analysis. Problems on Profit analysis. Problems on Operating Analysis. Problems on Financial leverage. Problems on Cost of Capital. Problems on Investment decisions. Problems on Capital budgeting</p> <p><b>Suggested Readings</b></p> <p>1.M.Y.Khan &amp; P.K. Jain: Cost Accounting &amp; Financial Management 2.Ravi M.Kishore: Cost &amp; management accounting</p>		
6	<b>BTMA0401</b>	<b>Industrial Statistics</b>	<b>2(1+1)</b>
	<p><b>Theory</b></p> <p>Definition and scope; sources of animal husbandry and dairy statistics. Measures of central tendency, Measures of dispersion, Moments, skewness and kurtosis. Elementary notions of probability, Laws of addition and multiplication probability. Theoretical frequency distributions: Binomial, Poisson and Normal distribution and their application. Concepts of sampling methods, Introduction to testing of hypotheses, Tests of significance-Z, t, F tests, and their application in the field of dairying. Analysis of variance- One-Way and two-way classification. Simple correlation coefficient and its test of significance, Linear regression, rank correlation. Basic concepts of statistical quality control, Control charts for variables and attributes, Fundamental concepts of acceptance sampling plan.</p> <p><b>Practical</b></p> <p>Measures of central tendency, Measures of dispersion, Moments, Skewness and Kurtosis Fitting of binomial and Poisson distribution. Application of 'Z' test for one and two sample problems. Application of 't' test for one and two sample problems. Application of Chi-square test and F-test. Correlation and regression. Rank correlation coefficient. Control chart for variables &amp; attributes</p> <p><b>Suggested Readings</b></p> <p>1.B.Philips Bevan: The industrial classes, and industrial statistics 2.Anand M. Joglekar: Industrial Statistics</p>
